

DTGPRO Introduces Platinum Rescue Cleaner for Heat Press and Heat Station Maintenance

New Platinum Rescue Cleaner removes adhesive, ink, DTF residue and scorch marks to help maintain cleaner heat press platens and production equipment.

COVINA, CA, UNITED STATES, August 11, 2026 /EINPresswire.com/ -- From the team behind MagicSeal, MagicInk, and other award-winning garment decoration products, the new [Platinum Rescue Cleaner](#) helps decorators remove stubborn ink, adhesive, DTF residue, scorch marks, and hardened buildup from heat press platens, heat stations, and equipment surfaces.

DTGPRO, a provider of professional DTF, heat transfer, garment decoration, and production workflow solutions, today announced the release of Platinum Rescue Cleaner, a specialized cleaning solution designed for heat press owners, heat station users, apparel decorators, DTF shops, and production environments that need to maintain cleaner equipment surfaces and reduce the risk of residue affecting future presses.

“

Platinum Rescue Cleaner was developed to help decorators quickly remove stubborn buildup and keep heat press equipment performing at its best.”

Jimmy Cons

Developed by the same team that brought decorators MagicSeal, MagicInk, and other award-winning production products, Platinum Rescue Cleaner was created to solve a problem every heat press and heat station owner eventually faces: stubborn residue, adhesive, ink, DTF powder, melted vinyl, scorch marks, glue, and hardened buildup that can collect on equipment surfaces and impact production quality.

“Most decorators do not think about platen cleaning until something goes wrong,” said a DTFSOLUTIONS spokesperson. “One transfer pressed without a cover sheet, one piece of vinyl

PRESS RELEASE
DTFSOLUTIONS INTRODUCES
PLATINUM RESCUE CLEANER

Professional cleaning solution for heat press platens, heat stations, and equipment surfaces.

- Removes hardened deposits, adhesive, ink, scorch marks, residue, and more.
- Helps maintain cleaner surfaces for better pressing results.
- Ideal for emergency cleanup and routine maintenance.
- For heat press platens, heat stations, and other equipment surfaces.

DTFSOLUTIONS FROM THE TEAM BEHIND MAGICSEAL, MAGICINK AND OTHER AWARD-WINNING PRODUCTS.

placed the wrong way, one overheated transfer, or one adhesive accident can leave behind residue that affects every press after it. Platinum Rescue Cleaner is the product many heat press and heat station owners may not realize they need until that first mistake happens.”

Platinum Rescue Cleaner is designed to help remove hardened deposits, adhesive, ink, scorch marks, and residue from heat press platens, heat stations, and other equipment surfaces. By helping eliminate stubborn buildup, the cleaner supports improved heat press and heat station performance while helping decorators reduce the risk of future garments being affected by old contamination.

Even small amounts of buildup on a platen or heat station surface can create problems. Sticky spots, baked-on adhesive, ink contamination, DTF powder, or melted vinyl residue can transfer onto garments, cause sticking, affect pressure consistency, damage prints, or create quality issues that may not be noticed until later jobs are already impacted.

“Your heat press is only as clean as the surface touching your garments,” the spokesperson added. “A dirty platen or heat station surface can ruin a clean transfer. Platinum Rescue Cleaner gives decorators a practical way to respond quickly when ink, adhesive, residue, or buildup becomes a problem.”

Platinum Rescue Cleaner can be used for both emergency cleanup and routine maintenance. It is intended for a wide range of heat-applied decoration workflows, including DTF, HTV, vinyl, sublimation, white toner transfers, plastisol transfers, screen print transfers, and general garment decoration production.

The product is also available as part of the DTF SOLUTIONS [HeatPress Rescue Kit](#), a complete cleanup bundle that includes:

100ml Platinum Rescue Cleaner

Professional heat press platen, heat station, and equipment surface cleaner for hardened deposits, adhesive, ink, scorch marks, glue, DTF residue, and stubborn buildup.

100% Cotton Lint-Free Cleaning Rag

For wiping platen, heat station, and equipment surfaces while minimizing excess fibers.

Heavy-Duty Razor Blade Scraper

For carefully removing softened buildup and stubborn contamination from suitable surfaces.

10 Extra Replacement Blades

Included for future cleanups, repeated use, and routine maintenance.

The DTFSOLUTIONS HeatPress Rescue Kit is ideal for DTF printing shops, HTV and vinyl users, sublimation shops, white toner transfer users, screen print transfer users, commercial apparel decorators, production shops, hobbyists, heat press owners, and heat station owners.

With the launch of Platinum Rescue Cleaner, DTFSOLUTIONS continues to expand its lineup of practical production solutions designed to help decorators work cleaner, reduce avoidable mistakes, and keep their equipment ready for more consistent results.

Platinum Rescue Cleaner and the DTFSOLUTIONS HeatPress Rescue Kit are available through DTGPRO.com and authorized DTFSOLUTIONS channels.

About DTGPRO | DTFSOLUTIONS

DTGPRO provides professional DTF printing, heat transfer, equipment, maintenance, and production workflow solutions for apparel decorators, print shops, transfer businesses, and garment customization professionals. From the team behind MagicSeal, MagicInk, and other award-winning products, the DTFSOLUTIONS product line focuses on practical solutions that support cleaner production, better workflow, and more reliable results across DTF, HTV, sublimation, toner transfer, screen print transfer, and related heat-applied decoration methods.
