

DTGPRO's MagicInk Wins the 2026 PRINTING United Pinnacle Award in the Textile Digital Inks Category

Made in the USA, patent-pending

MagicInk is recognized by PRINTING

United Alliance for innovation in textile digital ink technology.

COVINA, CA, UNITED STATES, August 11, 2026 /EINPresswire.com/ -- Made in the USA, Patent-

Pending [MAGICINK](#) - Clog-Free Textile Printing Ink

Recognized by PRINTING United Alliance for Innovation in Textile Printing Technology

“

Winning the PRINTING United Pinnacle Award reflects our commitment to developing practical innovations that simplify textile printing and improve production reliability.”

Jimmy Cons

Easy Group today announced that it's Made in the USA, patent-pending MagicInk technology has been named the winner of the 2026 Pinnacle Award in the Textile Digital Inks category by PRINTING United Alliance. The winning entry, "MAGICINK - Clog-Free Textile Printing Ink," was recognized for its innovation in simplifying textile printing workflows and addressing one of the industry's most

persistent production challenges: ink clogging and maintenance.

Developed and manufactured in the USA, MagicInk is a patent-pending textile ink technology with multiple patents pending. It was engineered to help move textile decoration away from maintenance-heavy, hardware-dependent systems and toward simpler, more reliable, chemistry-driven printing solutions.

Traditional DTF and DTG workflows rely heavily on pigment-dense textile inks, especially white ink systems, which can introduce clogging, pigment settling, daily cleaning, recirculation requirements, downtime, and high equipment costs. These challenges create barriers for new users while adding ongoing maintenance and operational complexity for established print shops.

MagicInk was developed to reduce those barriers. Its clog-free ink architecture is designed to eliminate the common clogging and maintenance issues associated with pigment-based textile inks, enabling consistent, uninterrupted printing with a cleaner and more stable print layer.

"Winning the 2026 Pinnacle Award in the Textile Digital Inks category is an incredible honor for our team," said Dr. Dimitris Constantinou of Easy Group. "MagicInk was developed to solve a real-world problem that textile printers face every day. By reducing clogging, removing white ink dependency in key workflows, and enabling the use of widely available printer platforms, MagicInk helps users print cleaner, maintain less, and produce more reliably."

MagicInk is a flexible ink platform for textile printing, with separate versions engineered for Canon and Epson desktop inkjet printers as well as traditional [DTF printer](#) systems. This allows standard off-the-shelf printers to be repurposed for textile decoration, significantly reducing equipment cost, setup complexity, and the need for specialized hardware.

In one workflow, users can print MagicInk onto DTF film using an off-the-shelf Canon or Epson printer, then cure the print using standard DTF powder, coated DTF film, foil, HTF film, or Easy Group's developing MagicPowder line. This enables soft, breathable, durable, and washable single-color transfers without requiring a dedicated DTF printer.

MagicInk is also designed to integrate with the [MAGICLINE](#) HTF system, enabling foil effects, colored powder applications, and specialty transfer results without relying on white ink. MagicPowder is being developed in a range of colors, including white and other specialty colors, allowing the final print color to come from the powder itself in certain workflows.

For full-color DTF applications, MagicInk can also be introduced into a traditional DTF printer in place of white ink. When paired with White MagicPowder, the powder provides both the white base and adhesive layer, eliminating the need for white ink while still supporting full-color DTF printing.

By enabling professional-grade textile decoration on lower-cost hardware, MagicInk expands accessibility for startups, small businesses, home-based decorators, and non-traditional operators. At the same time, it gives established production environments a low-maintenance alternative workflow that can reduce downtime, lower operational risk, and simplify day-to-day

production.

Key benefits of MagicInk include:

- Made in the USA
- Patent-pending technology
- Clog-free ink architecture
- No white ink required in supported workflows
- Enables use of off-the-shelf Canon and Epson desktop printers
- Supports traditional DTF printer integration
- Reduces or eliminates daily cleaning, purging, and circulation requirements
- Helps prevent pigment settling, sediment buildup, and printhead clogging
- Integrates with the MAGICLINE HTF system
- Supports foil effects and colored powder applications
- Produces soft, breathable, durable, and washable transfer results
- Reduces equipment cost and workflow complexity
- Expands access to professional-grade textile decoration
- Supports refillable cartridge and ink tank configurations
- Reduces consumable waste and long-term operating costs

MagicInk is available in bulk refill bottles and refillable cartridge or ink tank configurations, with versions engineered for Canon and Epson platforms as well as traditional DTF systems. The technology is designed to support consistent ink delivery, simplified maintenance, and lower-cost textile printing workflows.

The Pinnacle Awards recognize products and technologies that demonstrate excellence and innovation across the printing industry. Easy Group is proud to have MagicInk recognized among the industry's leading advancements and believes the technology represents a meaningful step forward for accessible, reliable, and scalable textile decoration.

About Easy Group

Easy Group develops and distributes specialty printing equipment, consumables, and technology solutions for textile printing, direct-to-film, direct-to-garment, HTF, UV, toner transfer, and related production workflows. Through its DTGPRO and MagicLine brands, Easy Group focuses on practical innovations that help print shops reduce maintenance, improve reliability, expand product offerings, and simplify production.

About MagicLine

MagicLine is Easy Group's family of textile printing products designed to simplify production and improve reliability. The MagicLine ecosystem includes MagicSeal, MagicInk, MagicPowder, MagicBond, MagicFoil, MagicMix, and related workflow solutions for modern textile printing.
