

The PicoWay® Treatment Now Available at Impeccable Aesthetics

Advanced picosecond laser technology now offered at Impeccable Aesthetics in Honolulu

HONOLULU, HI, UNITED STATES, July 23, 2026 /EINPresswire.com/ -- [Impeccable Aesthetics](#) is proud to announce that they now offer the revolutionary [PicoWay® from Candela](#). The PicoWay® was named the 2022 Aesthetic Awards Device of the Year and has been featured on the Today Show on NBC. Impeccable Aesthetics has incorporated this system into its state-of-the-art practice.

Meet the PicoWay® laser, intentionally designed to work from the inside out.

The PicoWay® system delivers high peak power and the shortest pulse durations for a non-thermal, photoacoustic effect that transforms skin from the inside out. This remarkably innovative PicoWay® laser can:

- Significantly improve acne scars and wrinkles with a series of quick, 15 to 20-minute treatments, with low to no downtime.
- Address a range of benign pigmented lesions with flexibility in depth and spot size.
- Treat a wide range of tattoos, even difficult-to-treat blue and green tattoos.

PicoWay® Resolve and PicoWay® Resolve Fusion are fractional, split-beam treatments available on the PicoWay® system, offering a popular, low-downtime option to address acne scars, wrinkles, and benign pigmented lesions.

"I am so excited to bring the PicoWay® system to my patients. The PicoWay is a major step forward in treating skin imperfections," said Joey Seson, MSN, APRN-Rx, MBA, founder and lead injector at Impeccable Aesthetics. "As soon as this device became available, I knew I had to have it for our office," he added.

The PicoWay® laser treatment stimulates collagen at a deeper level by utilizing three distinct energy wavelengths to address specific skin concerns. In contrast, an IPL treatment employs a wider range of wavelengths. While IPL can be effective in certain cases, it may not be as safe for darker skin types and does not stimulate collagen in the same manner.
