

AI-Powered Open Source BI Platform Helical Insight Makes Enterprise Features Free

Download the feature-complete Helical Insight Community Edition with AI analytics, dashboards, reporting, embedded BI, SSO & more - free and open source.

HYDERABAD, TELANGANA, INDIA, July 24, 2026 /EINPresswire.com/ -- Helical Insight, the open source Business Intelligence (BI) platform, with AI capabilities, developed by Helical IT Solutions, today announced a major update to its Community Edition, making enterprise-grade BI capabilities available in its free and open source offering.

With this announcement, organizations, developers, startups, educational institutions, and system integrators can access a feature-complete BI platform without the traditional feature limitations commonly associated with open source editions.

The Community Edition now includes capabilities such as AI-powered conversational analytics

“

We believe open source users deserve the complete product without artificial limits. We grow through enterprise support, implementation services, and customer success—not feature restrictions.”

Nikhilesh Tiwari, Director

(Bring Your Own LLM), interactive dashboards, pixel-perfect (paginated) reporting, embedded analytics, Single Sign-On (SSO), row-level security, multi-tenancy, white labeling, report scheduling, and report bursting.

Unlike the traditional "Community vs. Enterprise" model, Helical Insight has shifted its commercial strategy to focus on enterprise support and services rather than feature restrictions.

A Different Approach to Open Source BI

Many Business Intelligence platforms reserve advanced capabilities such as embedding, security,

reporting, and enterprise integrations for commercial editions.

Helical Insight has chosen a different path.

The Community Edition now provides the same core analytical capabilities as the Enterprise Edition. The primary differences are:

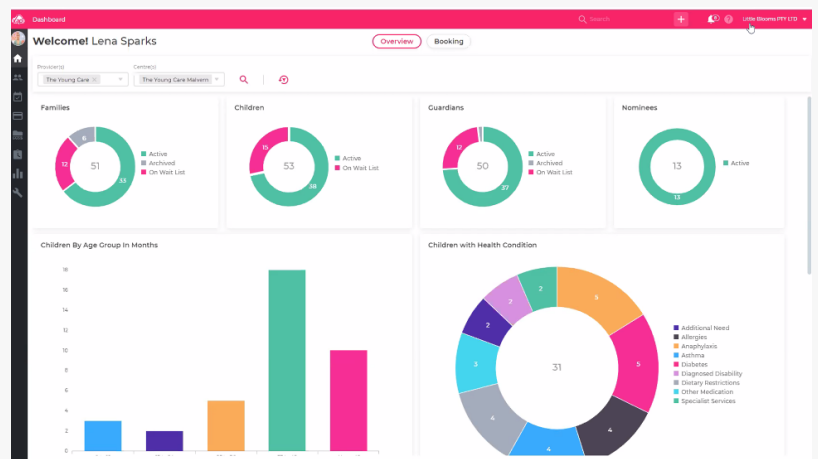

- Enterprise support with SLA-backed response times
- Professional implementation and consulting services
- Removal of Helical Insight branding from charts and exported reports

[Request Enterprise Demo](#)

This approach enables organizations to evaluate, deploy, and scale using the same platform they would use in production.

The landing page for Helical Insight features a dark blue background with white and green text. At the top, the Helical Insight logo is displayed alongside the tagline 'Open Source Business Intelligence'. The main headline reads 'Helical Insight Free Open Source BI with AI & Source Code'. Below this, a sub-headline states 'The complete Business Intelligence platform. 100% Free. 100% Open Source.' A central image shows a laptop displaying a sales dashboard with various charts and tables. To the right of the laptop is a green circular badge with the text 'OPEN SOURCE'. Below the main headline, there are four buttons: 'Download Now' (with a green download icon), 'Get Source Code' (with a blue code icon), 'Enterprise Support & Services' (with a purple gift icon), and 'Download Free' (with a green download icon). To the right of these buttons is a 'Star on GitHub' button. At the bottom, there are three icons: a cloud for 'Deploy Anywhere', a database for 'Connect to Any Data', and a shield for 'Secure & Scalable'. The website URL 'www.helicalinsight.com' and the GitHub repository 'github.com/helicalinsight/helicalinsight' are also listed.

Drag drop self service dashboards

Designed for Modern Analytics

Helical Insight combines multiple analytics capabilities within a single platform, including:

- AI-powered conversational analytics
- Interactive dashboards and data visualization
- Pixel-perfect paginated reporting
- Embedded analytics
- Multi-tenancy
- Role-based and row-level security
- White labelling
- Browser-based report and dashboard design
- Scheduling, alerts, and report bursting

The platform supports deployment on-premises, in private clouds, public cloud environments, Docker, and Kubernetes, while integrating with a wide range of relational databases, cloud data

warehouses, and modern query engines.

Availability

The feature-complete Community Edition is available immediately.
