

Dr.Look Ai Launches '7-Day Look Up Summer Challenge' Before Back-to-School

Dr.Look Ai launches a seven-day family checklist for screen-smart learning and real-world discovery in the final weeks of summer.

BOSTON, MA, UNITED STATES, July 28, 2026

/EINPresswire.com/ -- Dr.Look Ai today launched the '7-Day Look Up [Summer Challenge](#),' a family checklist that encourages children to observe, ask questions, and explore their everyday surroundings during the final weeks of summer and the transition to back-to-school.

Following the June 2026 North American debut of the [Dr.Look Ai Learning Camera](#), the challenge gives families a simple late-summer activity built around [screen-smart learning](#) and real-world discovery. It focuses not only on how much time children spend with technology, but also on what that technology invites them to do next.

Each day introduces one discovery prompt: something in nature, a favorite book, something in the kitchen, an object from a family trip, something that moves, something from another culture, or something the child has always wondered about. Families can complete the prompts by observing, taking photos, drawing, or talking together. Using the Learning Camera is optional, so the checklist can also stand on its own as a shared family activity.

Designed for children ages 3–10, the handheld Dr.Look Ai Learning Camera lets children point the camera at everyday objects and get age-appropriate explanations, quizzes, interactive stories, and pronunciation activities. It supports English, Spanish, French, German, and Portuguese and is designed to connect digital interaction with curiosity-led exploration beyond the display.

The graphic for the '7-Day Look Up Summer Challenge' features a purple and yellow color scheme. At the top, it says 'Dr.Look Ai' and '7-Day Look Up Summer Challenge' in large, playful fonts. Below this, a tagline reads 'A simple family activity before back-to-school'. The central part of the graphic shows a family (a man, a woman, and a child) sitting on a couch, looking at a smartphone. To the right, there's a smaller image of a child holding a camera. Below these images is a '7-DAY CHALLENGE' section with seven numbered prompts: 1. Nature (leaf icon), 2. Favorite Book (book icon), 3. Kitchen (pot icon), 4. Family Trip Object (suitcase icon), 5. Something That Moves (butterfly icon), 6. Another Culture (globe icon), and 7. Always Wondered About (question mark icon). At the bottom, there are four icons representing activities: 'Observe' (eye icon), 'Take photos' (camera icon), 'Draw' (pencil icon), and 'Talk together' (speech bubble icon). A pink Dr.Look Ai Learning Camera is shown on the right side of the graphic.

This summer, join the 7-Day Look Up Summer Challenge and turn everyday moments into learning adventures.

Kun Y., the CEO of Dr.Look Ai, said: "AI should not replace parents, teachers or the real world. It should help children look up, explore things around them and ask questions. The final weeks of summer can still hold new discoveries."

Dr.Look Ai grew from conversations among a small, hands-on team of fathers who encountered the same questions while raising their own children. They did not believe that removing technology altogether was the answer; they wanted to build something that encouraged children to look up, engage with their surroundings, and continue the conversation with parents and teachers.

The Learning Camera is screen-smart rather than screen-free. Its closed system has no open browser, no social media, and no third-party ads, while a companion parental-control app allows adults to manage content and usage. The product is available through Amazon, TikTok Shop, and drlookai.ai, and its design has

received a 2025 Red Dot Award and a 2026 iF Design Award.

“

AI should not replace parents, teachers or the real world. It should help children look up, explore things around them and ask questions. The final weeks of summer can still hold new discoveries.”

Kun Y., the CEO of Dr.Look Ai

About Dr.Look Ai

Dr.Look Ai is a children's education technology brand behind the Dr.Look Ai Learning Camera, a handheld, screen-smart device designed to turn curiosity about everyday surroundings into age-appropriate explanations, stories, quizzes, and multilingual exploration. Created by a small team of fathers, Dr.Look Ai believes technology for children should encourage real-world observation, questions, and shared discovery. Learn more at drlookai.ai.
