

Perixx PERIMICE-405 Combines USB-C Connectivity with an Ultra-Compact Travel Design

Compact USB-C wired mouse for laptops, tablets, and travel, with plug-and-play setup, 41 g body, ambidextrous design, and no charging needed.

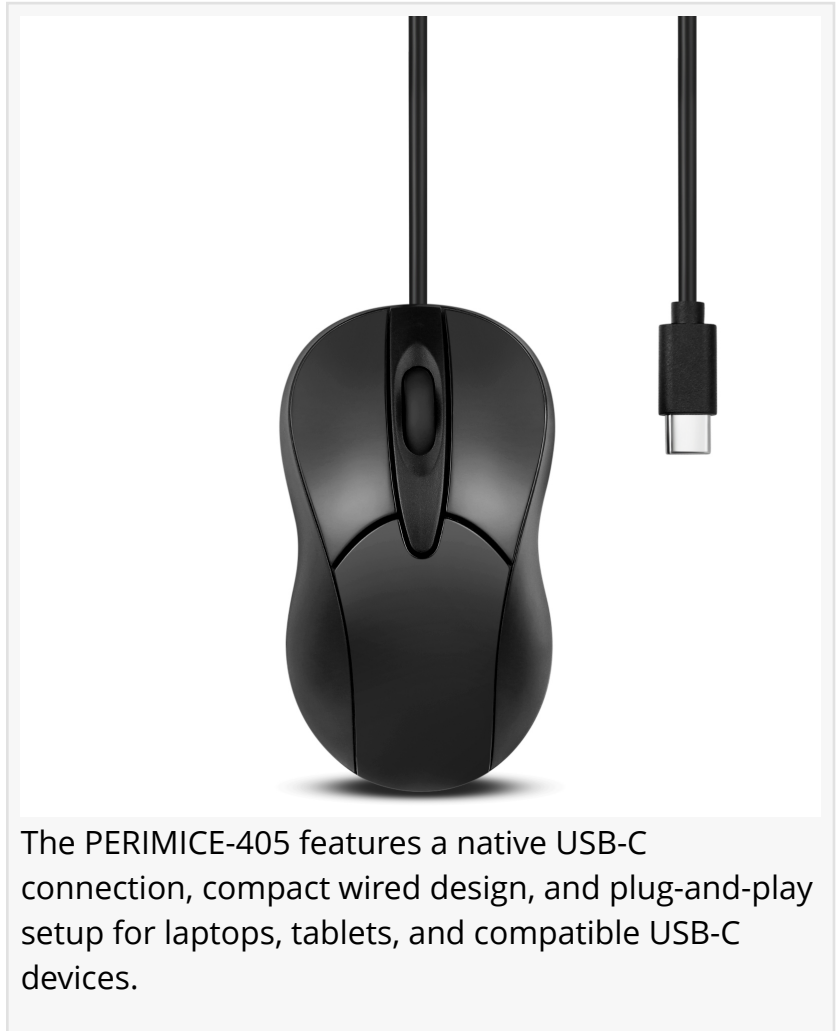

DÜSSELDORF, NRW, GERMANY, August 6, 2026 /EINPresswire.com/ -- [Perixx](#) presents the [PERIMICE-405](#), a compact wired mouse designed for USB-C laptops, tablets, smartphones, and mobile workstations. With native USB-C connectivity, lightweight construction, and plug-and-play operation, it provides a practical input solution for business travel, mobile work, study, and everyday computing.

Designed for USB-C Devices

The PERIMICE-405 is designed for today's USB-C devices, allowing users to connect directly to compatible laptops, tablets, and smartphones without requiring a USB-A receiver or separate adapter. Its native USB Type-C connector supports a simple wired setup for users who work across modern USB-C environments at home, in the office, in classrooms, or on the go.

The wired connection also eliminates Bluetooth pairing, replaceable batteries, and charging downtime. Users can connect the mouse to a compatible USB-C port and begin working immediately, without installing a dedicated driver or additional software.

The PERIMICE-405 is compatible with Windows 7, 8, 10, and 11, macOS, compatible Android USB-C devices, and USB-C iPad and iPad Air models with native mouse support. This broad

compatibility makes it a convenient option for users who need one compact wired mouse for multiple USB-C devices.

Compact and Travel-Friendly Design

Measuring $3.35 \times 1.85 \times 1.26$ inches and weighing only 1.45 ounces (41 grams), the PERIMICE-405 is built for users who need a mouse that can be carried easily in a laptop sleeve, backpack, briefcase, or accessory pocket.

Its compact footprint makes it suitable for business trips, mobile workstations, study spaces, shared desks, and users who prefer to keep a small wired mouse with their laptop or tablet. The short 2-foot USB-C cable helps reduce desk clutter and is especially useful in compact work areas, such as airplane trays, café tables, classrooms, hotel desks, and co-working spaces.

Ambidextrous Three-Button Layout

The PERIMICE-405 features a symmetrical shape that supports both left- and right-handed use. Its simple three-button layout includes left and right buttons together with a clickable scroll wheel, providing straightforward navigation for everyday tasks.

The primary mouse button can also be reassigned through the connected device's system settings where supported. The compact dimensions are optimized for portability and mobile use rather than the full-palm support of a larger desktop mouse.

An Additional USB-C Option

For users who prefer a retractable cable design, Perixx also offers the [PERIMICE-405CR](#). It shares the same compact USB-C format and plug-and-play convenience as the PERIMICE-405, while adding a built-in 2.5-foot retractable USB-C cable for easier storage and travel.

Availability
