

Why Manufacturers Continue to Choose American Forging Companies for Critical Components

American forging companies provide manufacturers with reliable, durable, and traceable critical components backed by domestic expertise and quality control.

CHICAGO, IL, UNITED STATES, July 29, 2026 /EINPresswire.com/ -- Chicago, Illinois, July 2026: [Cornell Forge Co.](#), a Chicago-based metal forge company located at 6666 W. 66th Street, continues to support manufacturers that require dependable American forging companies for critical components. With more than 90 years of family-owned experience, the company has built its reputation on producing complex forged parts for demanding industrial applications, including agriculture, off-highway, marine, oil, rail, construction, forestry, mining, power/utility, and truck component markets.

The logo for Cornell Forge, featuring the company name in a bold, black, sans-serif font. The letter 'C' is stylized with a small orange circle and a horizontal line passing through it.

Manufacturers continue to choose domestic forging partners because critical components demand strength, traceability, responsive communication, and reliable lead-time support. Cornell Forge Co. offers [closed-die hot forging](#), impression-die forging, microalloy forging, stainless steel forgings, [forged alloys](#), custom forged steel parts, and forged fittings. The company's ISO 9001:2015 certification and strict process controls support consistent quality while helping buyers reduce sourcing risk for high-performance equipment. This commitment allows manufacturers to source essential forged parts with greater confidence, consistency, and long-term reliability.

By combining experienced personnel, engineering-minded support, and value-added services

such as sawing, plating, machining, testing, inspection, and assembly, Cornell Forge Co. helps customers move from design needs to durable, production-ready solutions. Its made-in-the-USA focus gives manufacturers a practical choice for parts that require dimensional accuracy, long-term durability, and dependable supply-chain communication. This makes the company a trusted forging partner for industries that cannot afford delays, inconsistency, or compromised component performance.

For more information about American forging companies, custom forged steel parts, and industrial forging solutions, please contact their office at (708) 458-1582.
