

New Service RefineMyText.com Launches to Add the Human Touch Back Into AI-Generated Writing

Founder Michael K. Bender introduces a polishing and editing service built for the age of AI-assisted content

CAIRO, NY, UNITED STATES, July 29, 2026 /EINPresswire.com/ -- As AI writing tools flood inboxes, websites, and social feeds with content that often reads as generic, repetitive, or unmistakably machine-made, a new service is stepping in to solve the problem: RefineMyText.com.

“

AI can get people to a first draft faster than ever, but speed isn't the same as quality. A lot of AI writing sounds the same — safe, repetitive, missing a real voice.”

Michael K Bender

RefineMyText.com offers writing, editing, and full-scale polishing for documents, articles, marketing copy, and other materials that started with AI assistance. The service positions itself as the missing human layer for AI-generated material — taking drafts that are functional but flat and reworking them so they read as clear, compelling,

and authentically human.

"AI can get people to a first draft faster than ever, but speed isn't the same as quality," said Michael K. Bender, founder of RefineMyText.com. "A lot of AI writing sounds the same — safe, repetitive, missing a real voice. Our job is to take that draft and make it sound like an actual person wrote it, because in the end, a person did the thinking. We just help finish the job."

What RefineMyText.com Offers

- Full editing and rewriting of AI-assisted drafts for tone, clarity, and authenticity
- Line-by-line polishing to remove repetitive phrasing and "AI-sounding" patterns
- Review and refinement of business documents, marketing copy, articles, and personal writing
- A human-first quality check before content goes public

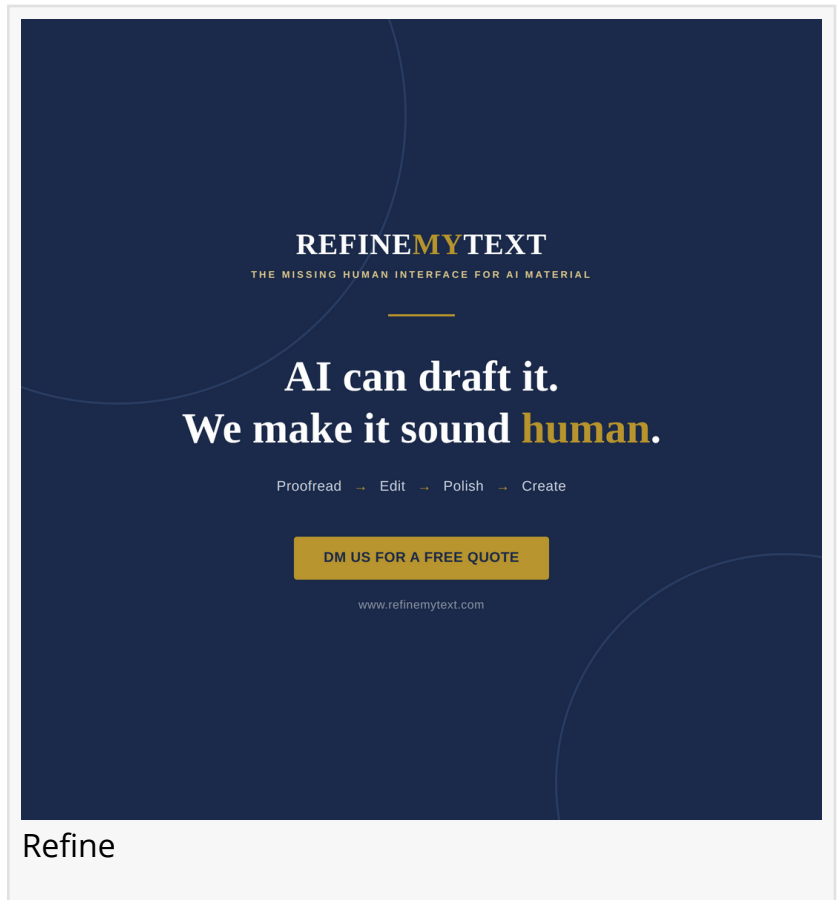

Why It Matters: As more writing — from marketing emails to internal memos to blog posts — starts with AI, the demand for a final human pass is growing. Readers and search engines alike increasingly favor content that feels genuine and well-crafted over text that reads as templated

or artificial. RefineMyText.com fills that gap, working as a finishing layer between AI output and the audience it's meant to reach.

Availability: RefineMyText.com is available now to individuals, small businesses, and organizations looking to refine AI-assisted writing before it's published or sent. More information is available at www.refinemytext.com.
