

GlyMed+ Expands Professional Skincare Line with Two New Oil-Based Formulas

Illuminating Cleansing Oil and Pure Glow SPF 60 Oil combine advanced skincare science, naturally derived ingredients, barrier support and elevated performance.

PROVO, UT, UNITED STATES, August 10, 2026 /EINPresswire.com/ -- GlyMed+ is expanding its professional skincare portfolio with the launch of two new oil-based formulas: Illuminating Cleansing Oil and Pure Glow SPF 60 Oil. Created to complement the brand's water-based portfolio, these innovative formulas give skincare professionals new ways to cleanse, nourish, protect and support the skin while elevating both treatment-room protocols and daily home care.

New GlyMed+ Oil-Based Products

Illuminating Cleansing Oil blends pharmaceutical-grade skincare technology with nourishing, naturally derived oils and emollients to deliver an effective first cleanse without leaving the skin feeling stripped. The formula helps dissolve makeup, sunscreen, excess oil and daily buildup, then emulsifies into a silky milk when activated with water for a clean, soft and refreshed finish.

Its luxurious oil texture also makes it a versatile addition to professional treatments, where it can be incorporated as a first cleanse or massage medium to provide smooth glide and an elevated sensory experience. By pairing high-performance skincare science with thoughtfully selected natural ingredients, Illuminating Cleansing Oil offers professionals a modern approach to cleansing that supports comfort, hydration and the skin barrier.

Pure Glow SPF 60 Oil completes the launch with antioxidant-rich, broad-spectrum sun protection in a lightweight oil format. Designed to hydrate and smooth the skin while imparting a luminous

finish, the formula delivers high-level protection without a heavy, greasy feel or visible white cast.

Together, the two formulas reflect GlyMed+’s commitment to uniting professional-grade performance, advanced formulation technology and naturally inspired ingredients. Both products are non-comedogenic and suitable for a wide range of skin types, including dry, sensitive and acne-prone skin. By helping replenish surface lipids and maintain hydration, the formulas support a comfortable, healthy-looking skin barrier while addressing daily environmental exposure.

For licensed professionals, the new oil-based products provide greater flexibility in treatment protocols, product layering and home care recommendations. For clients, they offer a simple, elevated approach to two essential skincare steps: cleansing and protecting.

“At GlyMed+, our focus has always been on giving skincare professionals products they can confidently use in the treatment room and recommend for home care,” said Jon McDaniel, President of GlyMed+. “These new oil-based formulas bring together the best of advanced skincare science and naturally derived ingredients to create an experience that feels luxurious while delivering the performance professionals expect from GlyMed+.”

Experience the next evolution of professional oil-based skincare. Discover Illuminating Cleansing Oil and Pure Glow SPF 60 Oil at GlyMedPlus.com or through an authorized GlyMed+ skincare professional.
