

Sterling Fleet Outfitters First to Bring Centurion Aluminum Truck Caps to Canada

A lighter, more secure, and more durable aluminum truck cap built for commercial fleets and contractors is now available across Canada.

LANGLEY, BRITISH COLUMBIA,
CANADA, July 30, 2026

/EINPresswire.com/ -- Sterling Fleet Outfitters, one of Canada's leading commercial vehicle upfitters, today announced the arrival of the [Centurion Aluminum Truck Cap](#), becoming the first company to introduce the product to the Canadian market.

Centurion Aluminum Truck Cap

Designed for contractors, service businesses, municipalities, and commercial fleets, the Centurion provides a modern alternative to conventional aluminum truck caps by improving durability, security, accessibility, and weather management.

“

Our customers look for products that improve productivity while standing up to demanding conditions. The Centurion delivers meaningful improvements in accessibility, durability, and security.”

*Sterling Fleet Outfitters
spokesperson*

The first shipment has arrived in Canada and inventory is now available for select Ford and Chevrolet pickup trucks.

What is the Centurion Aluminum Truck Cap?

The Centurion is a premium aluminum truck cap engineered specifically for commercial use. It combines lightweight construction with practical features that help tradespeople and fleet operators work more efficiently in the field.

Unlike many traditional aluminum canopies, the Centurion emphasizes easier equipment access, improved water management, and a more robust locking system while

maintaining the corrosion resistance and weight advantages of aluminum construction.

Why is the Centurion different?
Commercial fleets often choose aluminum truck caps because they reduce vehicle weight while providing secure, weather-resistant storage. The Centurion builds on those benefits with several key design improvements.

Key features include:

- Large side and rear access doors for easier loading and unloading
- Integrated design that channels water away from the truck bed
- Heavy-duty locking system for improved security
- Lightweight aluminum construction
- Corrosion-resistant materials for long service life
- Designed for commercial fleet and contractor applications

These features help technicians spend less time accessing tools and equipment while improving security and protecting valuable cargo.

First Available in Canada Through Sterling Fleet Outfitters

As the exclusive first Canadian supplier, Sterling Fleet Outfitters is introducing the Centurion to contractors and fleet managers looking for a stronger alternative to many existing aluminum truck caps.

For more than 24 years, Sterling has specialized in commercial vehicle outfitting, helping organizations across Canada improve productivity through professionally engineered truck and van upfits.

Available Truck Models

The Centurion Aluminum Truck Cap is currently available for:

- Ford Ranger (5' bed)
- Ford F-150 (5.5' bed)
- Ford F-150 (6.5' bed)
- Chevrolet Silverado (5' 8" bed)
- Chevrolet Silverado (6.5' bed)

Additional vehicle applications are expected in the future.
