

Chartered Institute's CESC™ Program Sets a New Global Benchmark for Energy Supply Chain Risk & Resilience Leadership

*Chartered Institute of Professional
Certifications Launches CESC™ Program*

to Empower Energy Supply Chain Disruption and Risk Management Professionals

SINGAPORE, SINGAPORE, August 19, 2026 /EINPresswire.com/ -- The [Chartered Institute of Professional Certifications](https://www.charteredcertifications.com)

“

Through the CESC™ program, we are equipping leaders with the expertise to anticipate disruption, safeguard business continuity, and strengthen the resilience of global energy supply chains.”

Bok Yan Lo

(www.charteredcertifications.com), a globally recognized authority in certified executive programs and professional development, is excited to announce the launch of its latest certification offering, the Certified Energy Supply Chain Disruption and Risk Management Leader (CESC™) program. Developed in collaboration with leading energy, supply chain, procurement, risk, and business continuity experts, this program is designed to equip professionals with the advanced knowledge and practical capabilities required to manage complex disruption risks across the global energy sector.

The CESC™ program responds to the evolving industry demand for leaders who can identify critical supply chain vulnerabilities, anticipate emerging threats, and implement effective resilience strategies across energy operations. Professionals who successfully complete the program will be better equipped to safeguard operational continuity, mitigate financial and operational risks, and coordinate effective responses to geopolitical instability, supplier failures, logistics disruptions, cyber incidents, extreme weather, and commodity market volatility.

The comprehensive curriculum of the CESC™ program covers a broad spectrum of essential topics, including energy supply chain risk mapping, supplier criticality assessment, geopolitical and regulatory risk, resilient sourcing, inventory and logistics continuity, contractual risk allocation, scenario analysis, stress testing, digital risk monitoring, early-warning indicators, business continuity planning, crisis response, and post-disruption recovery. The program integrates strategic frameworks with practical learning through case studies, risk-assessment exercises, crisis simulations, and a capstone resilience-planning workshop, enabling participants

to apply energy supply chain disruption and risk management principles in real-world contexts.

“Energy supply chains are navigating an increasingly volatile landscape shaped by geopolitical, operational, environmental, and technological threats,” said Bok Yan Lo, Managing Director of the Chartered Institute of Professional Certifications. “Through the CESC™ program, we are equipping leaders with the expertise to anticipate disruption, safeguard business continuity, and strengthen the resilience of global energy supply chains.”

Fully endorsed by the Chartered Institute of Professional Certifications, the CESC™ program is delivered through [live](#), instructor-led sessions that foster interactive learning, expert guidance, and practical knowledge exchange.

Upon completing the program and passing the examination, participants will be awarded the prestigious Certified Energy Supply Chain Disruption and Risk Management Leader (CESC™) designation. This globally recognized credential is exclusively granted to professionals who demonstrate the required expertise and practical competence in identifying, assessing, mitigating, and managing disruption risks across complex energy supply chains. Additionally, the program boasts independent certification and accreditation by CPD, maintaining the standards of the most rigorous principles of Continuing Professional Development.
