

eSafe Cyber Security and CyberLion Ltd. Announce Strategic Value Added Distribution Partnership for Southern Europe

TEL AVIVE, ISRAEL, August 2, 2026
/EINPresswire.com/ -- eSafe Cyber
Security and CyberLion Ltd. Announce
Strategic Value Added Distribution
Partnership for Southern Europe

Athens, Limassol, Malta and Rome —
July 30, 2026— eSafe Cyber Security
today announced a strategic Value
Added Distribution (VAD) partnership
with CyberLion Ltd., a boutique
cybersecurity software distributor
based in Israel.

Through this collaboration, eSafe Cyber
Security will make CyberLion's portfolio
of cybersecurity technologies available
across Greece, Cyprus, Malta and Italy,
providing organisations with broader
access to complementary security
solutions through eSafe's established regional presence, technical expertise and professional
services capabilities.

The partnership combines CyberLion's portfolio of cybersecurity vendors—including DigiCert
(Trust Lifecycle Manager, Content Trust Manager and UltraDNS), Outpost24, Dashlane,
ConnectWise, ISL Online, Blancco, PDQ and Cyber Intelligence House—with eSafe Cyber
Security's local sales, consulting, implementation and support capabilities across Southern
Europe.

The collaboration is designed to provide customers and partners with additional technology
options in areas such as digital trust, certificate lifecycle management, endpoint and patch
management, password security, secure remote access, secure data erasure, attack surface
management and cyber threat intelligence, while maintaining eSafe's consultative approach of

selecting the technologies that best align with each customer's business objectives, security strategy and operational requirements.

"We are delighted to partner with eSafe Cyber Security as we expand CyberLion's presence into Greece, Cyprus, Malta and Italy," said Ricardo Resnik, VP Biz Dev at CyberLion Ltd. "Their strong regional presence, technical expertise and trusted customer relationships make them an ideal partner to introduce our portfolio into these important markets."

"As a Value Added Distributor, our role extends well beyond product distribution," said Panicos Georgiou, CEO at eSafe Cyber Security. "Our objective is to help customers and partners identify the technologies that best address their business and security requirements, while providing the technical expertise, implementation services, enablement and ongoing support needed to maximise their value. This partnership expands the technology choices available to our regional ecosystem and further strengthens our ability to support a broader range of cybersecurity requirements."

Under the agreement, eSafe Cyber Security will act as the Value Added Distributor (VAD) for CyberLion's portfolio across Greece, Cyprus, Malta and Italy. Beyond product distribution, the partnership combines local technical consulting, implementation services, partner enablement, training and ongoing support, enabling customers and channel partners to successfully adopt and maximise the value of the available technologies.

The partnership also establishes the foundation for a broader long-term collaboration between the two organisations, with both companies committed to expanding their regional presence and continuously enhancing the value delivered to partners and customers across Southern

Europe.

About eSafe Cyber Security

eSafe Cyber Security is a leading cybersecurity solutions provider with offices in Greece, Cyprus, Malta and Italy, delivering cybersecurity consulting, managed security services and best-of-breed technology solutions to organisations across the region. Through a consultative approach, eSafe helps customers assess, select, implement and manage cybersecurity technologies aligned with their business objectives, regulatory requirements and risk profile.
