

Dental Bone Graft Substitutes Market Report Provides Insights Into Market Evolution And Growth Prospects

The Business Research Company's Dental Bone Graft Substitutes Market Report Provides Insights Into Market Evolution And Growth Prospects

LONDON, GREATER LONDON, UNITED KINGDOM, August 3, 2026

/EINPresswire.com/ -- "The [dental bone graft substitutes market](#) has been

experiencing significant growth recently, driven by advances in dental care and increasing patient awareness. This market is expected to continue its upward trajectory as new technologies and treatment methods emerge, offering promising opportunities for both patients and healthcare providers. Let's delve into the current market size, key growth drivers, leading regions, and future outlook for dental bone graft substitutes.

Expected to grow to \$5.76 billion in 2030 at a compound annual growth rate (CAGR) of 5.5%"

The Business Research Company

Steady Market Growth in Dental Bone Graft Substitutes from 2025 to 2030

The dental bone graft substitutes market is projected to rise from \$4.41 billion in 2025 to \$4.65 billion in 2026, growing at a compound annual growth rate (CAGR) of 5.6%. This expansion has been fueled by factors such as the increasing occurrence of periodontal diseases, a surge

in dental implant procedures, innovations in biomaterial science, growth in oral surgery practices, and greater patient awareness of restorative dental options. Looking ahead, the market is expected to expand further, reaching \$5.76 billion by 2030 with a CAGR of 5.5%.

bioengineered graft materials and a greater emphasis on minimally invasive grafting techniques. The expansion of regenerative dental therapies and increased adoption of guided bone regeneration are also contributing to the market's momentum. Additionally, there is growing investment in advanced biomaterials that promote faster bone healing, which is shaping the future landscape of this industry.

Understanding Dental Bone Graft Substitutes and Their Uses

Dental bone graft substitutes consist of biocompatible materials used to encourage bone regeneration in oral and maxillofacial surgeries. These substitutes help restore bone lost due to conditions such as tooth extractions, periodontal disease, trauma, or other dental issues. They are particularly important when a patient's natural bone volume or density is insufficient to support dental implants or other restorative procedures, providing a scaffold for new bone growth in the jaw area.

The Rising Impact of Dental Disorders on Market Growth

The growing prevalence of dental disorders plays a crucial role in driving demand for dental bone graft substitutes. Such disorders affect various parts of the oral cavity, including teeth, gums, and surrounding tissues. Treatments often require bone grafting to address deficiencies in jawbone structure or to support implants. For example, in August 2024, The Conversation U.S. reported that the proportion of the UK population suffering from gum disease is predicted to increase from 42% currently to 54% by 2050. This trend highlights the ongoing need for effective bone regeneration solutions in dental care.

Regional Leadership and Growth Trends in Dental Bone Graft Substitutes

North America held the largest share of the dental bone graft substitutes market in 2025, reflecting its advanced healthcare infrastructure and high adoption rates. Meanwhile, the Asia-Pacific region is expected to experience the fastest growth during the forecast period, driven by growing healthcare investments and expanding oral care awareness. Other key regions covered in the market analysis include South East Asia, Western Europe, Eastern Europe, South America, the Middle East, and Africa, offering a comprehensive global perspective.

Our 2026 market reports now feature expanded strategic intelligence through market attractiveness scoring and analysis, total addressable market (TAM) analysis, company scoring matrix graphics and tables, Excel-based dashboards, market hotspots infographics, key technology and future trend analysis, along with updated graphics and tables.
