

QuickCharge by Integra Energy Joins Passport Hub to Expand EV Roaming Across New York and the Northeast

Over 1,000 charging ports, and growing, at hotels, multifamily communities, and retail sites now accessible through North America's leading EV roaming platform.

MONTREAL, QUEBEC, CANADA, August 11, 2026 /EINPresswire.com/ --

ChargeHub, the operator of Passport Hub, North America's leading EV roaming platform with more than 165,000 compatible charging ports, today announced that QuickCharge by Integra Energy has joined Passport Hub. The integration brings more than 1,000 charging ports into the Passport Hub roaming ecosystem, spanning hotels, multifamily residential communities, and retail locations concentrated in New York State and the broader Northeast.

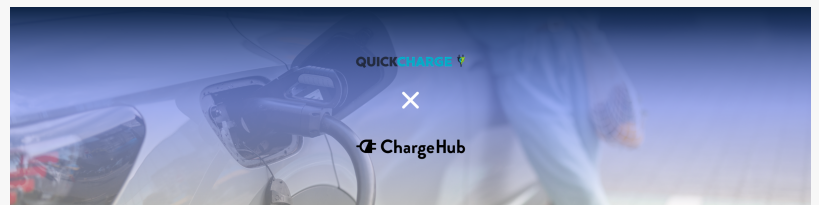

Partnerships like this are what drive Passport Hub's growth — and that growth is what makes truly seamless charging a reality for EV drivers, wherever they go."

*Simon Ouellette, CEO,
ChargeHub*

Founded in 2014 and headquartered in Albany, New York, Integra Energy delivers turnkey EV charging solutions to commercial property owners — managing everything from design and installation to permitting, funding support, and 24/7 monitoring. The company's QuickCharge network is built around the places drivers need charging most: where they sleep, live, and shop.

Through the Passport Hub integration, QuickCharge stations will be seamlessly accessible to drivers across the Passport Hub roaming network, while Integra Energy's property partners and their guests benefit from expanded interoperability without any additional integration effort.

"We've built QuickCharge from the ground up to serve the properties that drivers actually use every day — hotels, apartments, retail. What we hear from property owners and drivers alike is that they just want charging that works — no complicated apps, no surprises. That's what we've been building since the beginning, and joining Passport Hub means a lot more drivers get to experience that. It's a valuable partnership for us." — Max Schynoll, Product Development

Quick-Charge X ChargeHub

Manager, Integra Energy

"As EV adoption accelerates, drivers need roaming that works everywhere — not just on major corridors, but at the hotels and retail destinations they use every day. Integra Energy brings exactly that: a regional network with deep local roots, strong property relationships, and a demonstrated commitment to reliability. Partnerships like this are what drive Passport Hub's growth — and that growth is what makes truly seamless charging a reality for EV drivers, wherever they go." — Simon Ouellette, CEO, ChargeHub

About ChargeHub

ChargeHub is renowned for its unique Passport Hub solution, the leading EV roaming platform in North America, trusted by automakers, e-mobility service providers (eMSPs), and charge point operators (CPOs), as it currently enables over 750 live roaming connections within the ecosystem. Its turnkey solution simplifies integrations, streamlines operations, and enables large-scale EV roaming for drivers across the continent. Passport Hub also supports secure, automated Plug & Charge transactions, offering the most seamless, end-to-end charging experience. Additionally, ChargeHub operates North America's largest network-independent, community-driven EV charging app, used by over 1 million drivers annually.

About Integra Energy

Founded in 2014 and headquartered in Albany, New York, Integra Energy is a full-service EV charging and energy solutions provider specializing in turnkey installations for commercial property owners across the United States. From site design and installation to permitting, funding support, and 24/7 network monitoring, Integra Energy manages every step of the process — making it simple for hotels, multifamily communities, and retail destinations nationwide to offer reliable EV charging without the operational burden.

Integra Energy's proprietary QuickCharge network connects drivers to charging across several hundred locations nationwide, accessible through an intuitive app offering real-time charger availability, hassle-free payment processing, and instant session management from any device. The company works closely with utilities and state and federal agencies across the country to identify and unlock available funding, navigate incentive programs, and streamline grid connectivity — helping property owners significantly reduce deployment costs while contributing to electrification targets at a national scale.
