

Apps4Rent Announces Industry-Best Session-Based QuickBooks Hosting - Price Starting at Just \$12/Month

Apps4Rent launches leading session-based QuickBooks Hosting starting at just \$12/month, offering secure cloud access, scalability, and seamless collaboration.

MAPLEWOOD, NJ, UNITED STATES, August 6, 2026 /EINPresswire.com/ -- [Apps4Rent](#), a trusted provider of cloud hosting and managed IT services, has introduced new session-based [QuickBooks hosting](#) plans starting at just \$12 per month. The new pricing gives businesses, accounting firms, CPAs, and bookkeepers a more affordable way to run QuickBooks. They can do this without the cost of purchasing and maintaining on-site server infrastructure.

The advertisement features a laptop displaying a cloud hosting interface with server racks and a bar chart. Above the laptop, the text reads: 'Apps4Rent PREMIUM APPLICATION HOSTING', 'INDUSTRY-LEADING', 'QuickBooks Hosting Providers', 'Secure. Reliable. Affordable.', and '\$12 /Month'. Below the laptop, the large 'Apps4Rent' logo is shown with 'PREMIUM APPLICATION HOSTING' underneath. At the bottom, it says 'logo Apps4rent Quickbook hosting provider'.

Affordable QuickBooks Hosting for Businesses of Every Size

Businesses rely on cloud-based accounting to keep their accounting software accessible from anywhere. Apps4Rent's \$12/month session-based hosting plan is designed for single-user access and includes 5 GB SSD storage, making it an affordable option for individual users. Businesses that require multi-user collaboration can choose higher-tier hosting plans that support multiple concurrent users.

Customers can also choose a hosting plan that fits their current needs and increase resources later as their business grows. This makes deployment simpler while keeping billing and software management in one place. Businesses can review the latest [QuickBooks Enterprise pricing](#) to compare available licensing options.

Secure Multi-User Collaboration with Enterprise-Grade Performance

Apps4Rent's cloud-based QuickBooks offering works with all the main editions of QuickBooks (QuickBooks Pro, Premier, Enterprise, Accountant, and industry-specific editions). Several users can work securely in real time in collaboration from remote locations. The hosted QuickBooks system can be accessed securely from Windows, macOS, Linux, iOS, Android, and Chromebook devices.

"We want businesses of every size to have access to secure and affordable QuickBooks hosting," said the Managing Director of Apps4Rent. "Our single-user session-based hosting plan starts at just \$12 per month, giving customers reliable cloud access, dependable performance, and expert technical support without the high costs that usually come with maintaining on-premises infrastructure."

Simplifying Licensing While Reducing IT Costs

These new bundle-based licensing programs use genuine Intuit licenses along with Apps4Rent's hosting solutions. Business owners will be able to buy software and hosting in one place rather than dealing with different vendors.

Firms that already have QuickBooks licenses can opt for the BYOL program and use their existing licenses. Transparent pricing, flexible hosting plans, and simplified license management make it easier for businesses to adopt QuickBooks hosting. They will not have to spend money on in-house server infrastructure.

Built for Secure, Scalable Cloud Accounting

Apps4Rent's QuickBooks hosting service is designed to accommodate companies of all sizes. Customers benefit from enterprise-grade cloud resources, proactive monitoring, daily data backups, 24/7 support, and scalable computing resources that grow with their business.

Key capabilities include:

Single-user session-based QuickBooks hosting starting at just \$12 per month with 5 GB SSD storage, and a 20% discount on QuickBooks licenses.

Hosted on secure SOC 2 Type II certified data centers

Round-the-clock monitoring by experienced cloud engineers

Automatic backup schedules to support business continuity

Optional multi-factor authentication and SSL encryption

Assistance from certified QuickBooks and cloud hosting specialists

Flexible computing resources that grow with business needs

Integration with Microsoft 365, Excel, and third-party business applications

Professional migration assistance designed to reduce deployment disruption

These additions reflect Apps4Rent's ongoing commitment to providing reliable cloud-hosted accounting solutions for businesses.

About Apps4Rent
