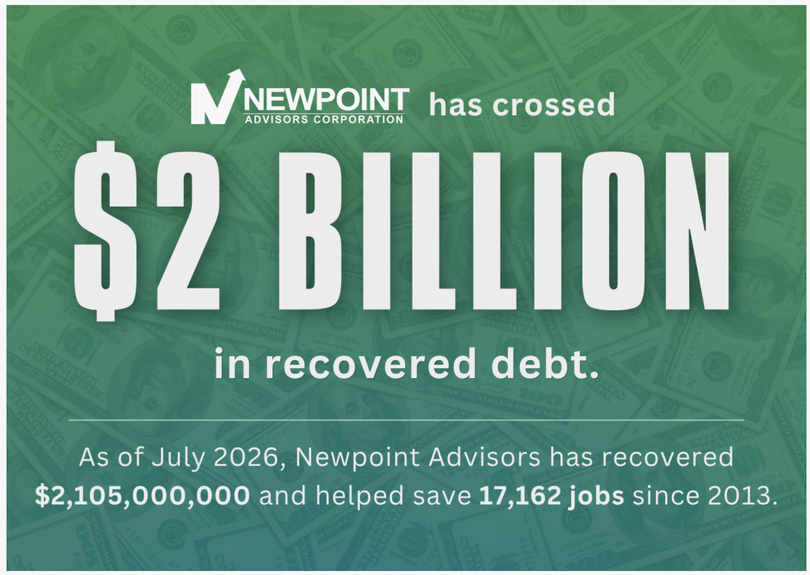
Newpoint Advisors Corporation Surpasses $2 Billion in Recovered Debt Amid Rising Small Business Bankruptcies

The firm has now helped save more than 17,000 jobs nationwide since 2013.



BRENTWOOD, TN, UNITED STATES, August 6, 2026 /EINPresswire.com/ -- Newpoint Advisors Corporation, a North American financial advisory firm, announced it has officially crossed the $2 billion mark in recovered debt. As of June 2026, the firm has recovered $2,105,000,000 on behalf of the businesses it serves and has helped save 17,162 jobs nationally since 2013.

The milestone comes as Newpoint's proprietary Lower Middle Market Business Distress Index shows small business bankruptcy filings up 35% compared to the same period last year, underscoring the growing need for the kind of turnaround work the firm specializes in.

> This work matters more now than ever. Our focus stays the same: give owners the tools to recognize trouble early and act while they still have options."
> *Kenneth R. Yager, President of Newpoint Advisors Corporation*

"Crossing $2 billion in recovered debt is a significant milestone for our team, but it's really a reflection of the business owners who trusted us to help them through some of the hardest decisions they will ever make," said Kenneth R. Yager, President of Newpoint Advisors Corporation. "With bankruptcy filings up 35% this year and distress spreading across nearly every industry, this work matters more now than ever. Our focus stays the same: give owners the tools to recognize trouble early and act while they still have options."

Newpoint works with financially distressed and underperforming businesses generating $5 to $50 million in revenue, guiding them through turnaround, restructuring and recovery for a fixed fee and on a fixed timeline. The firm's approach centers on early intervention, helping owners identify warning signs, evaluate their options and build a clear path forward before a temporary setback becomes an existential threat. That work spans operational assessments, cash flow education, negotiations with lenders and creditors and, when needed, formal restructuring, all aimed at preserving as much of the business, and as many jobs, as possible.
