

Flat Fee vs. Percentage: What Denver Landlords Actually Pay for Property Management in 2026 according to TurboTenant

TurboTenant is demonstrating with worked examples how its flat-fee model can save landlords significant sums of money versus conventional property management.

FORT COLLINS, CO, UNITED STATES,
August 6, 2026 /EINPresswire.com/ --

Traditional Denver property managers typically charge 8-10% of monthly rent plus placement and maintenance markups. However, TurboTenant is now suggesting that they're paying too much. Given that Denver's monthly average rent is now \$1,889 in 2026, landlords are becoming increasingly dissatisfied with percentage-based fees. TurboTenant is suggesting that property owners are looking at their operating costs and considering whether it's really worth paying a conventional [Denver property management company](#) to do all the administration for them.

Comparing the real cost of conventional property management to TurboTenant's flat-fee model reveals the true scale of the markup many landlords are paying, as shown by the following:

Feature	-	Traditional Percentage Model	-	TurboTenant Flat-Fee Model
Monthly Management Fee	-	~8-10% of monthly rent	-	Fixed monthly rate (Starting under \$17/mo)
Tenant Placement Fee	-	50-100% of one month's rent	-	\$0 until tenant is placed
Maintenance Markups	-	10-20% added to repair bills	-	No maintenance markups

The differences between these two financial models can be illustrated by applying them to Denver's current market data.

Under a standard 10% management fee based on Denver's average monthly rent of \$1,889, a landlord would pay \$188.90 per month, totaling \$2,266.80 annually. Including a one-time tenant placement fee equal to 50% of one month's rent (\$944.50), the estimated annual base cost for a

property owner reaches \$3,211.30.

In contrast, the flat-fee model utilized by TurboTenant for its Pro plan costs \$199 per year, with no additional tenant placement fees. This brings the annual base cost to \$199.

Based on these figures, the transition from a percentage-based system to a flat-fee structure represents a difference of approximately \$3,000 per year for a single rental unit. To date, TurboTenant has grown its operations to include the management of over 4,000 units, the coordination of 180,000 on-demand showings, and the placement of more than 10,000 tenants.
