

NEXGEN DNA, Inc. Launches PooStation™, Redefining Commercial Pet Waste Management for Modern Communities

Patent-pending innovation combines oversized biodegradable bags, sanitary hands-free operation, LED illumination, and commercial-grade engineering.

BOCA RATON, FL, UNITED STATES, August 6, 2026 /EINPresswire.com/ -- NEXGEN DNA, Inc. today

“

We didn't set out to build another pet waste station. We set out to redefine the category with cleaner, more sanitary, sustainable design and convenience over enforcement.”

Avi Kosch

announced the official launch of PooStation™, a patent-pending commercial pet waste station developed to modernize an industry that has seen little meaningful innovation for decades.

Designed for HOAs, apartment communities, municipalities, parks, senior living communities, hospitality properties, mixed-use developments, and commercial real estate, PooStation™ has been engineered to help communities become cleaner, more sanitary, easier to maintain, and more environmentally responsible.

At the core of PooStation™ is a simple philosophy: Convenience over Enforcement. PooStation™ features a 1,200-bag dispenser, a 20-gallon waste collection system, oversized biodegradable pet waste bags, oversized biodegradable trash can liners, ADA-conscious hand lever and foot pedal operation, integrated LED lighting, a self-locking service design, and commercial-grade construction.

Sanitation was a primary design objective. The foot pedal and hand lever reduce unnecessary contact, while the overlapping lid design helps keep rainwater, insects, and debris out of the waste compartment.

"We didn't set out to build another pet waste station," said Avi Kosh, Founder & CEO of NEXGEN DNA, Inc. "We challenged ourselves to rethink every aspect of the experience—from sanitation and maintenance to capacity, accessibility, sustainability, and reliability."

PooStation™ is the flagship product of NEXGEN DNA, Inc. and PooStation.com serves as an

educational resource for property managers, builders, municipalities, HOAs, architects, and facility professionals.

PooStation™ is now available for pre-orders nationwide.
