

Totlesoft Announces ADLAS 2026 to Advance Africa's AI Workforce

Free virtual AI summit on 15 August 2026 will bring together global experts to advance Africa's AI workforce and digital future.

PORT HARCOURT, RIVERS, NIGERIA, August 6, 2026 /EINPresswire.com/ -- [Totlesoft](#) Announces [ADLAS 2026](#) to Unite Global AI Leaders Around Africa's Emerging AI Workforce

Free virtual summit will bring together founders, AI experts, entrepreneurs, researchers, and industry leaders to explore Africa's role in building the next generation of artificial intelligence.

Totlesoft has officially announced the inaugural [AI Data Labeling Africa Summit](#) (ADLAS 2026), a free virtual conference scheduled for 15 August 2026, bringing together technology leaders, AI entrepreneurs, startup founders, researchers, educators, and workforce development experts from Africa and around the world.

“

Africa has the talent to help shape the future of AI. ADLAS 2026 is bringing together leaders and learners to turn that potential into practical opportunity.”

Christotle Agholor, Founder of Totlesoft & Conference Chair, ADLAS 2026

As Artificial Intelligence rapidly reshapes industries, ADLAS 2026 seeks to position Africa as a key contributor to the global AI ecosystem by focusing on one of its fastest-growing sectors: AI data labeling, human feedback, AI evaluation, and digital workforce development.

The summit comes at a time when demand for high-quality AI training data and human intelligence services

continues to grow alongside the rapid adoption of generative AI technologies worldwide.

Hosted by Totlesoft, ADLAS 2026 aims to bridge the gap between awareness and opportunity by helping students, professionals, entrepreneurs, businesses, policymakers, and institutions understand where Africa fits within the evolving AI economy.

International Speakers Join the Inaugural Summit

Several respected technology and innovation leaders have already confirmed their participation.

Confirmed speakers include:

Hazem Torab, Founder & CEO of Day Off and Enozom, who will present "How to Make Your SaaS Product Agent-Ready," exploring how software companies can prepare for a future where AI agents increasingly become their customers.

Just Ibe, President of The Association of African Startups (TAAS), who will speak on building a thriving African startup ecosystem for the AI economy.

Tabitha Ngozi, Founder of Goal Quest Academy, who will deliver a keynote on preparing Africa's workforce for emerging careers in AI operations, prompt engineering, data labeling, and AI literacy.

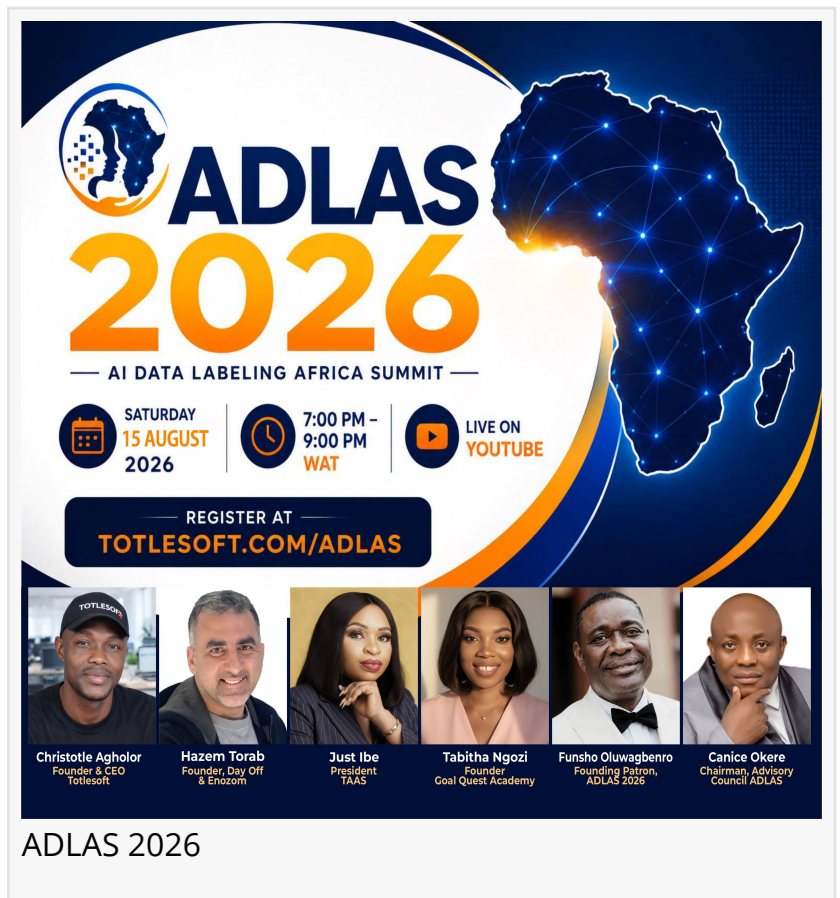

Additional industry experts, ecosystem partners, and organizational leaders are expected to be announced before the event.

A Practical Focus on Africa's AI Opportunity

Unlike many AI conferences centered on model development alone, ADLAS 2026 focuses on the practical opportunities already available within today's AI economy.

Sessions will examine:

- AI data labeling and dataset creation
- Human feedback for Large Language Models (RLHF)
- AI evaluation and quality assurance
- Responsible AI and trustworthy datasets
- AI workforce development
- AI entrepreneurship
- Building AI-ready SaaS products
- Digital skills for the future of work

The poster for ADLAS 2026 features a dark blue background with a glowing map of Africa on the right side, connected by a network of blue lines and dots. On the left, there is a circular logo with a stylized map of Africa. The text "ADLAS 2026" is prominently displayed in large, bold letters, with "ADLAS" in blue and "2026" in orange. Below this, it says "AI DATA LABELING AFRICA SUMMIT". The event details are listed: "SATURDAY 15 AUGUST 2026" with a calendar icon, "7:00 PM - 9:00 PM WAT" with a clock icon, and "LIVE ON YOUTUBE" with a YouTube icon. A registration link "REGISTER AT TOTLESOFT.COM/ADLAS" is provided. At the bottom, there are six headshots of speakers with their names and titles: Christotle Agholor (Founder & CEO, Totlesoft), Hazem Torab (Founder, Day Off & Enozom), Just Ibe (President, TAAS), Tabitha Ngozi (Founder, Goal Quest Academy), Funsho Oluwagbenro (Founding Patron, ADLAS 2026), and Canice Okere (Chairman, Advisory Council ADLAS).

ADLAS 2026

The summit is designed to provide participants with actionable knowledge they can immediately apply in their careers, organizations, and businesses.

Building Africa's Human Infrastructure for AI

According to Christotle Agholor, Founder of Totlesoft and Conference Chair of ADLAS 2026, Africa's greatest opportunity in Artificial Intelligence extends beyond building AI models.

"Artificial Intelligence is creating entirely new categories of work that depend on human expertise. Africa possesses one of the world's youngest and fastest-growing talent populations. ADLAS was created to connect that talent with practical opportunities in the global AI economy while encouraging collaboration between technology companies, educational institutions, startups, governments, and development partners."

He added that AI workforce development has become an essential component of digital economic growth and that collaboration will be critical in ensuring African professionals are prepared for future opportunities.

A Platform for Collaboration

ADLAS 2026 has also opened invitations to technology companies, universities, innovation hubs, startup ecosystems, government agencies, investors, media organizations, and development partners interested in supporting Africa's AI future.

Participation is free, and attendees who complete the summit will receive a digital participation certificate.

Registration is now open.

Event Details

Event: AI Data Labeling Africa Summit (ADLAS 2026)

Date: Saturday, 15 August 2026

Time: 7:00 PM – 9:00 PM (WAT)

Venue: Virtual
