

Vroozu to Host Webinar on Modernizing SAP Procurement Without Sacrificing Clean Core Standards

August 13 session will address how procurement teams can improve user adoption and workflow flexibility while keeping their SAP environment upgrade-ready

LOS ANGELES, CA, UNITED STATES, August 6, 2026 /EINPresswire.com/ -- Vroozu, a leading provider of [AI-powered procurement and accounts payable automation solutions](#), today announced it will host a live webinar on August 13 examining how organizations can modernize procurement inside an SAP environment without adding unnecessary customization to the ERP core that complicates future upgrades.

“

Many SAP customers want a better procurement experience without adding complexity to the ERP. We'll share practical ways to apply clean core principles.”

*Conor Mullaney, Founder,
BizRes*

Titled "Modern Procurement for SAP: Faster Adaptation, Lower Cost, Better Control," the 20-minute session is scheduled for Thursday, August 13 at 10:00 a.m. PT / 1:00 p.m. ET and will feature Mike Jud of Vroozu alongside Conor

Mullaney of BizRes. The two will discuss why procurement transformation projects commonly stall, how to build user adoption around a purchasing experience that mirrors online shopping rather than relying on extensive training, and how businesses can support complex procurement processes while maintaining clean core principles.

Attendees will also get a look at how Vroozu supports organizations at any stage of their SAP journey, whether they are planning a migration to SAP S/4HANA or already operating on the platform, along with a live product demonstration.

"SAP teams are under pressure to give users a buying experience that feels modern, but every workaround they build inside the ERP adds risk to the next upgrade," said Shaz Khan, CEO of Vroozu. "This session is about showing procurement leaders they don't have to choose between flexibility and a clean core. Vroozu was built to sit alongside SAP and take on that complexity so IT doesn't have to."

“Many SAP customers are trying to improve the procurement experience without creating more

complexity in the ERP environment,” said Conor Mullaney, founder of BizRes. “We’ll discuss practical ways teams can balance user needs, process flexibility and clean core principles.”

Registration for the webinar is now open. Interested attendees can reserve a spot at vroozi.com/modern-procurement-for-sap.

About Vroozi

Vroozi, the intelligent procure-to-pay platform, delivers AI-powered spend management, marketplace, and accounts payable automation solutions for mid-market and enterprise organizations. The SpendTech® platform digitizes procurement and invoice management while intelligently orchestrating workflows to drive visibility, compliance and cost control.
