

California Democratic Party Supports Proposition 38 to Advance Breakthrough Immunology Medical Research & Cures

Prop 38 gives hope to millions of patients and families by supporting research that will help prevent and cure many devastating diseases in our lifetime

SACRAMENTO, CA, CA, UNITED STATES, August 6, 2026 /EINPresswire.com/ --

The California Democratic Party announced its support for [YES on Proposition 38](#), a ballot measure that will advance life-saving research to prevent and cure diseases like cancer,

Alzheimer's and heart disease, which impact nearly every California family. The endorsement adds to the growing coalition of Prop 38 supporters that includes patients, health advocates, doctors, researchers, scientists, nurses and social justice advocates.

“

As a four-time cancer survivor, I've seen firsthand how years of scientific research can transform a patient's future.

Immunotherapies gave me more hope, more time – something every patient deserves.”

Lila Javan, Immunotherapy Patient and Cancer Survivor

“As a four-time cancer survivor, I've seen firsthand how years of scientific research can transform a patient's future,” Lila Javan, Immunotherapy Patient and Cancer Survivor. “Immunotherapies gave me more hope and more time – something every patient and their family deserves.”

Prop 38 will provide \$8.4 billion in vitally needed funding for California-based public universities and nonprofit medical research institutions to conduct groundbreaking research to find treatments and cures for debilitating diseases like cancer, Alzheimer's, heart disease, neurodegenerative and autoimmune disorders, and other

serious illnesses affecting millions of families.

Immunotherapies are a form of medical treatments that harness the body's own immune

system to recognize and stop diseases. In recent years, [breakthrough immunotherapies](#) have been developed that prevent and fight cancers like melanoma, lung cancer, certain leukemias and lymphomas, and more.

The measure comes at a critical moment as uncertainty in federal research funding threatens scientific progress, delays clinical trials, and puts future medical breakthroughs at risk—a concerning factor that led to overwhelming [support of party delegates](#) at the party's annual convention last weekend.

Paid for by YES on 38: Californians for Life-Saving Immunology Research and Cures, sponsored, by the Michelson Center for Public Policy, Committee Top Funders, Gary K. Michelson and Affiliated Entity Michelson for Public Policy, Meyer Luskin
