

Veteran-Led Startup KAP PRO Launches APP With Bold Vision to Build America's Top Drone Platform

ALEXANDRIA, VA, UNITED STATES, August 7, 2026 /EINPresswire.com/ -- As the commercial drone industry continues to expand across infrastructure, public safety, construction, agriculture, insurance, energy, and logistics, veteran-founded startup KAP PRO is positioning itself to become a comprehensive workforce development and services platform for the next generation of drone professionals.

Founded by military veterans Darius Poydras and Keith Hall, KAP PRO is launching with an ambitious vision: to create a connected ecosystem where individuals can learn, earn certification, develop a drone business, and ultimately connect with commercial and residential clients through one integrated platform.

The company describes its mission in six words: "Your Golden Ticket into the Drone Industry."

From Military Leadership to Entrepreneurial Vision

KAP PRO was founded by two veterans whose careers span military leadership, engineering, business, and technology.

Co-Founders: Keith Hall on the left & Darius Poydras to the right.

Darius Poydras, Co-Founder of KAP PRO

Co-founder Darius Poydras is a U.S. Air Force and U.S. Marine Corps veteran whose background includes engineering, automation, cybersecurity, electro-mechanical systems, and emerging technologies. His experience spans military operations and complex technical environments, shaping his belief that workforce development should create clear pathways into high-demand industries.

“Technology creates opportunity,” said Poydras. “Our vision is to make the commercial drone industry more accessible by combining education, professional development, and business opportunities into one connected ecosystem.”

Keith Hall, Co-Founder of KAP PRO

Co-founder Keith Hall serves as an Army Officer and Commander of a Drone Unit in the State of Texas. With additional experience in business and marketing, Hall brings operational leadership and strategic growth expertise to the company.

“We believe the future of the drone industry isn’t just about aircraft—it’s about building a professional workforce,” Hall said. “KAP PRO is being designed to help individuals develop careers while helping organizations connect with qualified drone professionals.”

More Than a Training App

At the center of the platform is the KAP PRO Flight Trainer App, which prepares users for the FAA Part 107 Remote Pilot Certificate examination.

The founders view the app as the first step in a broader ecosystem that is planned to include:

- KAP PRO Trainer
- KAP PRO Drone Academy
- Verified Drone Operator Program
- Professional Drone Services Marketplace

The company's long-term roadmap includes connecting qualified drone operators with commercial and residential clients while supporting business development, continuing education, and workforce networking.

KAP PRO also sees future opportunities to collaborate with government agencies, educational institutions, municipalities, and private industry through drone education, workforce development, and professional services.

Positioned for a Growing Industry

Commercial drone adoption continues to expand across sectors, including:

- Construction
- Real estate
- Public safety
- Infrastructure
- Agriculture
- Energy
- Insurance
- Environmental services
- Media production

The founders believe this growth creates demand not only for skilled drone operators, but also for platforms that support professional development and client connections.

Seeking Strategic Investment

As an early-stage startup, KAP PRO is preparing for its initial capital raise and is seeking conversations with angel investors, strategic investors, and private equity partners who share its long-term vision for the commercial drone economy.

The company plans to use investment to accelerate:

- Product development
- Platform engineering
- Artificial intelligence capabilities
- Marketplace infrastructure
- National marketing
- Strategic partnerships
- Workforce development initiatives
- Team expansion

“We’re not simply building another app,” said Poydras. “We’re building a platform designed to support careers, entrepreneurship, and innovation throughout the commercial drone industry.”

About KAP PRO

KAP PRO is a veteran-founded startup focused on drone education, workforce development, and professional services. The company’s mission is to help individuals enter and grow within the commercial drone industry through technology, training, professional networking, and future marketplace opportunities.

As KAP PRO grows, it aims to become a trusted platform connecting aspiring drone professionals, experienced operators, businesses, and organizations across the United States.

Investment & Media Inquiries

KAP PRO welcomes inquiries from accredited investors, strategic partners, media organizations, and industry collaborators interested in learning more about its vision and growth strategy.
