

Endoscopy Video Systems Market Insights Highlight Segment Expansion And Market Leadership

The Business Research Company's Endoscopy Video Systems Market Insights Highlight Segment Expansion And Market Leadership

LONDON, GREATER LONDON, UNITED KINGDOM, August 6, 2026

/EINPresswire.com/ -- "The [endoscopy video systems market](#) has been

witnessing substantial growth recently, driven by advancements in medical imaging and a rising need for precise diagnostic tools. This sector is evolving rapidly as healthcare providers adopt new technologies to improve patient outcomes. Let's explore the current market size, the main factors fueling expansion, and the key regional dynamics shaping its future.

Expected to grow to \$40.94 billion in 2030 at a compound annual growth rate (CAGR) of 7.8%

"

The Business Research Company

Market Size Outlook and Expansion in the Endoscopy Video Systems Market

The endoscopy video systems market has seen significant growth in recent years. It is projected to increase from \$28.41 billion in 2025 to \$30.34 billion in 2026, representing a compound annual growth rate (CAGR) of 6.8%. This growth during the historical period has been driven by the increased utilization of endoscopic diagnostics, a rise in gastrointestinal procedures, growing

demand for precise visual assessments, widespread availability of video-enabled endoscopy platforms, and enhancements in healthcare infrastructure.

Looking ahead, the market is expected to continue its strong upward trajectory, reaching \$40.94 billion by 2030 with an accelerated CAGR of 7.8%. Key factors behind this forecast include the growing adoption of AI-assisted visualization tools, greater demand for minimally invasive diagnostic methods, expansion of outpatient endoscopy services, increased investments in digital operating rooms, and a focus on image-guided interventions. Trends shaping the market include the widespread use of high-definition and 4K video systems, integration of advanced image processing software, demand for real-time visualization during procedures, development

What Endoscopy Video Systems Are and Their Medical Application

Endoscopy video systems are specialized medical imaging devices designed to provide a live view inside the body's cavities or organs. These systems assist healthcare professionals in diagnosing and treating various conditions by allowing internal visualization through a minimally invasive endoscope. They are used across numerous medical specialties to examine organs and facilitate medical interventions, making them essential tools in modern diagnostics.

Key Factors Stimulating Growth in the Endoscopy Video Systems Market

A major driver of the endoscopy video systems market is the increasing prevalence of stomach and colorectal cancers. Stomach cancer originates in the lining cells of the stomach, while colorectal cancer develops in the colon or rectum. Endoscopic video systems play a critical role in these cancers by enabling physicians to screen and diagnose through the insertion of an endoscope into the gastrointestinal tract.

For example, in February 2025, the American Cancer Society, a nonprofit organization based in the US, reported an estimated 154,270 new cases of colorectal cancer, up from 152,810 in 2024. This rising incidence of gastrointestinal cancers directly supports the expanding need for endoscopy video systems worldwide.

Leading Geographic Markets in the Endoscopy Video Systems Sector

In 2025, North America held the largest share of the endoscopy video systems market. The report also covers other important regions including Asia-Pacific, South East Asia, Western Europe, Eastern Europe, South America, the Middle East, and Africa, presenting a comprehensive overview of global market dynamics. As healthcare infrastructure and technology adoption vary across these regions, understanding their individual growth patterns is essential for grasping the market's full potential.

New analytical features added to our 2026 market reports:

- Market attractiveness scoring and analysis
- Total addressable market (TAM) analysis
- Company scoring matrix graphics and tables
- Excel-based forecasting dashboards

- Market hotspots infographics
- Key technologies and future trend analysis
- Updated graphics and tables
