

APS Launches Jet Transition Program for Aspiring Professional Pilots

Gain real-world jet experience designed for pilots transitioning to professional aviation careers.

MESA, AZ, UNITED STATES, August 6, 2026 /EINPresswire.com/ -- Aviation Performance Solutions (APS), a global leader in Upset Prevention and Recovery Training (UPRT), has announced the launch of its new Jet Transition Program, designed to bridge the gap between general aviation training and professional jet operations. No jet type-rating, high-performance endorsement, or high-altitude endorsement required.

The program offers pilots a unique opportunity to gain real-world jet experience in the SIAI-Marchetti S-211, guided by highly experienced military jet instructors. Built for pilots progressing toward airline, corporate, or other professional aviation careers, the program delivers practical exposure to jet handling and advanced flight environments.

“

This program delivers both confidence and capability as pilots transition into professional aviation roles.”

Paul 'BJ' Ransbury

Participants can choose from a range of flexible training options, from a half-day introductory jet experience to

comprehensive multi-day programs that incorporate simulator sessions, virtual reality training, and optional high-altitude flight profiles.

A key focus of the Jet Transition Program is addressing loss of control in flight (LOC-I), the leading cause of aviation fatalities worldwide. Through APS's proven UPRT methodology, pilots receive hands-on training in stalls, unusual attitudes, and aircraft upset scenarios in a high-performance jet environment.

“Our goal is to provide pilots with meaningful, real-world jet experience at a critical stage in their

development,” said Paul BJ Ransbury, CEO at APS. “This program delivers both confidence and capability as pilots transition into professional aviation roles.”

Enrollment is now open. For more information or to reserve a training slot, visit <https://apstraining.com/transition>

ABOUT AVIATION PERFORMANCE SOLUTIONS (APS)

We Help Pilots Bring Everyone Home Safely

Aviation Performance Solutions (APS) is the global leader in Upset Prevention and Recovery Training (UPRT), with specialized expertise in Jet UPRT for professional pilots. Focused on reducing Loss of Control In-flight (LOC-I), the leading cause of aviation fatalities, APS delivers a comprehensive training approach that blends academics, on-aircraft instruction, advanced simulation, and virtual reality. APS’s UPRT methodology has been validated through independently verified research showing significant improvements in pilots’ upset recognition, recovery performance, and resilience to startle and surprise in real-world training environments.

Trusted by airlines, business aviation operators, military organizations, and corporate flight departments worldwide, APS helps pilots build the skills and confidence needed to prevent and recover from in-flight upsets. APS’s brand promise reflects the high standard behind every training program: Every Pilot Trained – In Control – All The Time.
