

Frameworkx Acquires AD Micro Technology to Expand Capabilities, Strengthen Client Support, and Accelerate Growth

Acquisition brings together AI-powered IT help desk, security, and managed services expertise with project-delivery strength

EDMONTON, ALBERTA, CANADA, August 6, 2026 /EINPresswire.com/ -- [Frameworkx](#), a leading IT consulting and managed services provider, today announced the acquisition of [AD Micro Technology](#), provider of managed IT services, including support, networking, security, backup, cloud, and printer management. The acquisition brings together two organizations with strong client relationships, complementary expertise, and a shared commitment to high-quality service.

AD Micro Technology has built a long-standing reputation for trusted client partnerships and strong project delivery. Through the acquisition, Frameworkx gains additional talent, deeper market reach, and opportunities to broaden its service offering across its existing customer base and AD Micro Technology's clients.

“

Together, we're building a stronger, more scalable platform designed to deliver lasting value for clients now and into the future.”

Dan Reid, CEO of Frameworkx

“We built AD Micro Technology on strong client relationships, trusted service, and a commitment to delivering meaningful value over time,” said Kimson Dy Ning, founder of AD Micro Technology. “Becoming part of Frameworkx creates an important opportunity to scale that foundation within a larger organization, while continuing to serve customers with the same level of care and consistency they have come to expect.”

The acquisition aligns with Frameworkx's broader strategy to scale in response to rapid industry shifts, particularly the rise of artificial intelligence and the growing demand for strategic AI governance.

To lead that shift, Framewerx recently launched [Neuralwerx](#), an AI-powered IT help desk and security platform designed to streamline support, accelerate ticket resolution, and strengthen cybersecurity. By combining Neuralwerx's AI-driven capabilities with AD Micro Technologies' hands-on operational strength, Framewerx is positioned to deliver a more comprehensive, efficient IT ecosystem to mid-market businesses.

"Following the success of our Neuralwerx launch, this acquisition represents another important step in executing our long-term vision," said Dan Reid, CEO of Framewerx. "AD Micro Technology brings strong client relationships, proven delivery expertise, and capabilities that will enhance what we can offer across our organization. Together, we're building a stronger, more scalable platform designed to deliver lasting value for clients now and into the future."

AD Micro Technology will continue operating as a brand within the Framewerx organization during the transition period, with plans to fully integrate staff into Framewerx by the end of the year, increasing headcount by 30%.

About AD Micro Technology

Founded in 1992 and headquartered in Richmond, British Columbia, AD Micro Technology provides managed IT services, including support, networking, security, backup, cloud, infrastructure, and printer/copier management. For more than 25 years, the company has helped businesses in the Greater Vancouver area improve productivity and efficiency with responsive, professional technology support.
