

Vertikal6 Earns a Place on the Inc. 5000 Through Continued Innovation and Growth

Recognition Reflects the Company's Continued Investment in Managed Services, Cybersecurity, AI, CMMC Readiness and Client Success

PROVIDENCE, RI, UNITED STATES,
August 11, 2026 /EINPresswire.com/ --

[Vertikal6](#), a leading provider of managed IT, cybersecurity, AI, cloud, software development, and digital marketing solutions, today announced it has been ranked No. 3797 on the 2026 Inc. 5000 annual list of America's fastest-growing private companies.

The annual Inc. 5000 recognizes the nation's most successful independent businesses that have demonstrated exceptional revenue growth while continuing to innovate and create lasting value for their customers, employees, and communities.

“

Growth isn't our goal -
earning our clients' trust is.
Growth is simply the result
of getting that right.”

Rick Norberg, CEO

"This recognition is a tremendous honor, but it's really a reflection of the people behind it," said Rick Norberg, CEO of Vertikal6. "We've built Vertikal6 by staying focused on people, solving real business challenges, and never

standing still. This recognition belongs to every employee who shows up each day committed to helping our clients succeed, and to every client who has trusted us to be part of their journey."

Vertikal6 has experienced significant growth by expanding its comprehensive portfolio of technology services designed to help organizations modernize operations, strengthen cybersecurity, embrace artificial intelligence, and accelerate digital transformation. The company's unique ability to deliver end-to-end technology solutions—from managed IT services to custom software development, website development, digital marketing, and artificial intelligence—continues to differentiate it in the marketplace.

A key driver of Vertikal6's continued growth has been its investment in services that help organizations move beyond traditional IT support. Through its [elevate™ Managed Services](#) platform, Vertikal6 delivers a proactive, strategic approach to technology management by

combining managed IT, cybersecurity, cloud, and compliance, into a comprehensive solution that best positions its clients for growth. Rather than simply responding to technology issues, elevate™ Managed Services helps organizations reduce risk, improve operational maturity, strengthen security, and align technology investments with long-term business objectives.

Building on that foundation, Vertikal6 has expanded its artificial intelligence practice with CLARITY, a proven methodology that helps organizations move beyond experimentation to measurable business outcomes and succeed with AI. The framework combines AI strategy, governance, implementation, change management, user adoption, and ongoing optimization to ensure AI delivers lasting business value. Supported by Microsoft AI-certified professionals, software developers, business analysts, and consultants, CLARITY enables organizations to confidently operationalize AI while maximizing productivity, efficiency, and return on investment.

Vertikal6 has also strengthened its cybersecurity and compliance practice with comprehensive [CMMC](#) Readiness Services for manufacturers supporting the defense industrial base. Drawing from its own journey toward CMMC Level 2 certification, Vertikal6 helps organizations assess their current environment, identify gaps against all 110 CMMC Level 2 practices, develop prioritized remediation roadmaps, and maintain the documentation and evidence needed to demonstrate ongoing compliance. By combining hands-on advisory services with its elevate™ Managed Services platform, Vertikal6 enables manufacturers to strengthen their cybersecurity posture while building sustainable readiness for future CMMC assessments.

Over the past several years, Vertikal6 has continued to invest in its people, expand its capabilities, and enhance the client experience while growing its presence throughout the Northeast. The company has earned 3 Microsoft Solutions Partner designations for Infrastructure (Azure), Modern Work and Security, has been named one of the region's Best Places to Work for ten consecutive years, and continues to help organizations confidently navigate an increasingly complex technology landscape.

"Making the Inc. 5000 is an incredible milestone, but we see it as motivation rather than a finish line," Norberg added. "Technology continues to evolve at an unprecedented pace, and we're committed to staying ahead of it. Through innovations like our elevate™ Managed Services platform, CLARITY AI methodology, and CMMC capabilities, we're helping organizations transform technology into a competitive advantage. We're excited about what's ahead—for our company, our team, and the clients we have the privilege to serve."

The Inc. 5000 list represents companies that are driving innovation, creating jobs, and shaping the future of the American economy. Inclusion on the list places Vertikal6 among an elite group of businesses that have achieved extraordinary growth while maintaining an ongoing commitment to client success and operational excellence.

As Vertikal6 looks to the future, the company will continue investing in cybersecurity, managed

services, artificial intelligence, cloud technologies, software development, and digital innovation to help organizations confidently navigate what's next.

About Vertikal6

Vertikal6 is a full-service technology partner helping organizations elevate performance through managed IT services, cybersecurity, cloud solutions, artificial intelligence, software development, website development, and digital marketing. Through its elevate™ Managed Services platform and CLARITY AI methodology, Vertikal6 helps businesses reduce complexity, improve operational performance, and transform technology into a strategic competitive advantage. Serving organizations throughout the Northeast and beyond, Vertikal6 is committed to delivering measurable outcomes through innovation, partnership, and exceptional client service.
