

Prism PPM Recognized in the 2026 Gartner® Magic Quadrant™ for Adaptive Project Management and Reporting

DOVER, DE, UNITED STATES, August 10, 2026 /EINPresswire.com/ -- Prism PPM, a leading SaaS Project Portfolio Management (PPM) platform, has been recognized as a Niche Player in the 2026 Gartner® Magic Quadrant™ for Adaptive Project Management and Reporting (APMR).

PRISM PPM

According to the research: “Gartner defines the adaptive project management and reporting (APMR) market as technologies that support PPM functions aligned to business units such as a PMO. These tools optimize project and product delivery, manage complex resource allocation, and track progress through reporting and dashboards.”

“

We will continue investing in capabilities that simplify portfolio management, improve executive visibility and help organizations make more informed decisions across their project portfolios.”

Caitlin Bowen, CEO, Prism PPM

“We're proud to once again be included in the Gartner Magic Quadrant as Prism PPM continues to evolve alongside the changing needs of today's project and program leaders,” said Caitlin Bowen, CEO, Prism PPM. “By combining adaptive project management with AI-powered automation, intuitive planning and powerful analytics, we're helping organizations improve governance, strengthen resource planning and give executives the visibility they need to make more informed decisions.”

Bowen added, “We believe, this recognition reinforces our commitment to continuous innovation. We will continue investing in capabilities that simplify portfolio management, improve executive visibility and help organizations make more informed decisions across their project portfolios.”

Prism PPM: Continued Product Innovation

Prism PPM continues to advance its product roadmap with investments in a modernized user experience, Agentic AI-powered workflows, AI-assisted planning, natural language querying and executive briefing capabilities. Together with native integrations and advanced analytics powered by Microsoft Power BI and Databricks, these enhancements help project management offices reduce manual effort, improve portfolio visibility, optimize resource allocation and give leaders the insights they need to make faster, more informed decisions.
