

Fr. Morson Livingston Releases 'When the Machines Learn', Offering Christian Wisdom for an AI-Driven World

LAND O' LAKES, FL, UNITED STATES, August 8, 2026 /EINPresswire.com/ -- Author Fr. Morson Livingston announces the release of [When the Machines Learn](#): Ancient Wisdom for a Happy Life in the Age of Artificial Intelligence, a thought-provoking new book that examines what it means to remain fully human as artificial intelligence continues to reshape everyday life. Drawing on more than four decades of pastoral ministry, education, and chaplaincy, the book offers practical guidance rooted in timeless Christian wisdom for readers seeking clarity, purpose, and hope in a rapidly changing world.

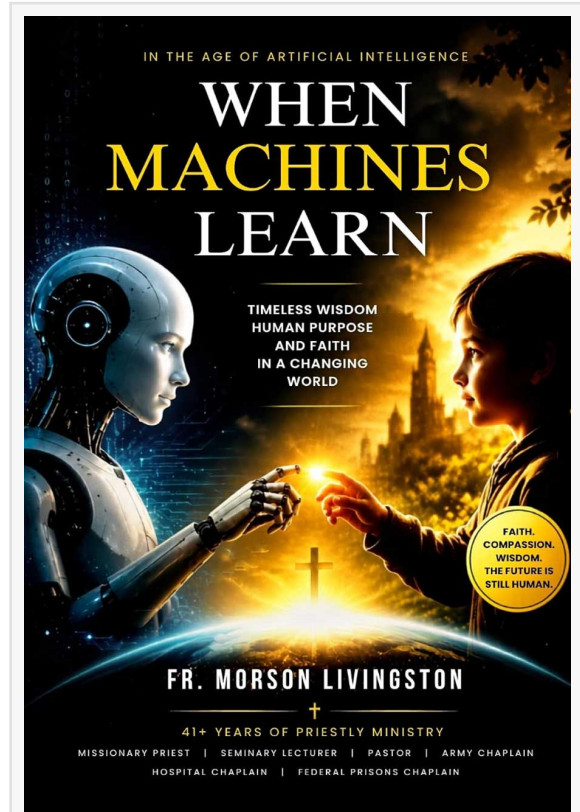

Availability

When the Machines Learn: Ancient Wisdom for a Happy Life in the Age of Artificial Intelligence is available worldwide in Kindle and Paperback editions on Amazon: <https://www.amazon.com/dp/B0HBMN4PYP>

A Practical Guide for an AI-Shaped Future

As artificial intelligence becomes increasingly integrated into work, education, communication, and decision-making, many people are asking deeper questions about identity, relationships, and meaning. "When the Machines Learn" addresses those concerns by focusing on qualities that define the human person, including wisdom, conscience, freedom, compassion, and faith. Organized into five movements, the book follows a natural progression that mirrors the Christian journey. Readers move from exploring humanity's search for meaning to encountering Christ, living as a disciple, reflecting on personal faith, and ultimately embracing the hope of eternal life. The structure creates a thoughtful narrative that connects today's technological landscape with enduring spiritual truths.

Experience Shaped by Decades of Service

When the Machines Learn by Fr. Morson Livingston

Fr. Morson brings firsthand experience gained through years of serving as a missionary priest, hospital chaplain, prison chaplain, and educator. His conversations with individuals facing life's most significant moments provide the foundation for the book's practical insights and compassionate perspective.

The volume also includes appendices that offer guidance for Catholics living in an AI world, an overview of Church teaching on artificial intelligence, and reflection questions suitable for individual readers, study groups, and parish discussions.

A Resource for Readers Seeking Wisdom and Purpose

Rather than focusing on technical developments or future predictions, *When the Machines Learn* encourages readers to cultivate lasting virtues that remain relevant regardless of technological change. Themes such as prayer, service, friendship, forgiveness, contentment, and moral responsibility are presented as practical habits that strengthen both personal and spiritual growth. Here is a recent article published [about the book](#).

"Artificial intelligence will continue to change the world around us, but the deeper question remains unchanged. How do we live with wisdom, love, and hope? My prayer is that this book helps readers discover answers that endure beyond every technological advance," said Fr. Morson Livingston, Author.

About Fr. Morson Livingston

Fr. Morson Livingston is a missionary priest, educator, and chaplain with more than forty years of ministry experience. Throughout his vocation, he has served in hospitals, prisons, schools, and communities, accompanying people through moments of joy, suffering, uncertainty, and hope. *When the Machines Learn: Ancient Wisdom for a Happy Life in the Age of Artificial Intelligence* reflects the wisdom gained from a lifetime of pastoral service and offers readers a thoughtful perspective on living faithfully in an age shaped by artificial intelligence.
