

First Class Moving Systems Expands Long-Distance Moving Services Between Florida and Ohio, Illinois, and Michigan

South Florida-based moving company strengthens its Long-Distance moving corridors connecting Florida to Ohio, Illinois, and Michigan.

FT LAUDERDALE, FL, UNITED STATES, August 6, 2026 /EINPresswire.com/ -- TAMPA, FL — First Class Moving Systems, Inc., a Florida-based moving and relocation company serving the state since 2001, has expanded its Long-Distance moving services to strengthen its corridors between Florida and Ohio, Illinois, and Michigan. The company now offers dedicated residential and commercial relocation support for households and businesses moving in either direction along these routes, drawing on its wholesale partnerships with North American Van Lines and Allied Van Lines to provide reliable, coordinated long-haul moving capacity.

Florida has long seen steady relocation traffic to and from the Midwest, with families, retirees, and businesses moving between the two regions throughout the year. First Class Moving Systems has built its Long-Distance moving operation around these established corridors, giving customers a single point of contact for a move that can otherwise involve multiple carriers, brokers, and handoffs.

"[Florida to Ohio](#), Illinois, and Michigan are some of the busiest Long-Distance corridors we handle, and we've built our process specifically around what these moves require," said Alex Franceschi of First Class Moving Systems. "Whether it's a family relocating for a new job, a retiree heading north to be closer to grandchildren, or a business consolidating operations, our crews are trained to protect every item in the shipment from pickup in Florida all the way to delivery in the Midwest."

A Dedicated Corridor Approach

Rather than treating every long-distance move the same way, First Class Moving Systems has structured its Ohio, Illinois, and [Michigan corridors](#) around the realities of Midwest relocations, including seasonal weather considerations, multi-stop routing for customers splitting shipments between cities, and coordination with high-rise and elevator-dependent buildings common in cities such as Chicago, Columbus, and Detroit. The company's crews are trained to protect furniture, electronics, and fragile items using professional-grade packing materials and custom crating for items such as pianos, artwork, and safes.

For customers who need a gap between move-out and move-in dates, First Class Moving Systems offers climate-controlled storage at its Florida facilities, allowing shipments to be staged and protected before final delivery to Ohio, Illinois, or Michigan. This is particularly useful for customers navigating overlapping closing dates, corporate relocation timelines, or seasonal moves tied to school calendars.

Serving Households and Businesses Alike

On the residential side, First Class Moving Systems' Long-Distance service includes full-service packing and unpacking, furniture disassembly and reassembly, and specialty handling for high-value items. The company works with families relocating for employment changes, military transfers, retirement, and lifestyle moves between Florida and the Midwest.

On the commercial side, the company's sister brand, First Class Commercial Services, supports office relocations, warehousing, and logistics for businesses moving operations or opening satellite locations between Florida and Ohio, Illinois, or Michigan. A second sister brand, First Class Global Logistics, extends this support further with technology-driven logistics solutions and truckload and less-than-truckload (LTL) transportation for businesses with larger or more complex shipments.

All Long-Distance moves along these corridors ship through First Class Moving Systems' wholesale partnerships with North American Van Lines and Allied Van Lines, giving customers access to established national moving networks while working directly with a company that has served Florida since 2001. The company holds AMSA ProMover certification and maintains the licensing and insurance coverage required for interstate household goods transportation.

Company Background

First Class Moving Systems is part of the First Class Companies family, a family-run group of moving and logistics brands headquartered in Tampa, Florida, with additional locations in Fort Lauderdale, Miami, and the Gulfport-Biloxi/New Orleans area. Founded in 2001, the company has grown from a single Tampa-based operation into a multi-location mover with dedicated residential, commercial, and logistics divisions serving customers throughout Florida and along key interstate corridors, including its Ohio, Illinois, and Michigan routes.

Company leadership has said the expanded focus on these corridors reflects sustained demand from Florida customers relocating to and from the Midwest, and that the company intends to continue investing in the crews, equipment, and storage capacity needed to support these routes as demand grows.

How to Get Started

Customers planning a Long-Distance move between Florida and Ohio, Illinois, or Michigan can request a free, no-obligation moving quote through the company's website at www.movewithclass.com, where visitors can find additional detail on residential, commercial, and storage services available along these corridors.

ABOUT

First Class Moving Systems is a Florida-based moving company serving the state since 2001. As part of the First Class Companies family, headquartered in Tampa, Florida, the company offers local, intra-state, interstate, and international residential moving, as well as commercial moving and logistics through sister brands First Class Commercial Services and First Class Global Logistics. First Class Moving Systems is an AMSA ProMover and an agent for North American Van Lines, and it also partners with Allied Van Lines to provide nationwide moving capacity. The company operates locations in Tampa, Fort Lauderdale, Miami, and the Gulfport-Biloxi/New Orleans area. More information is available at www.movewithclass.com.
