

BionicVO Is Now Live: The Man Behind Nearly a Thousand Award-Winning Ads Launches His AI Voice Platform

Oink Ink Radio founder Dan Price opens BionicVO to the public, applying four decades of audio advertising expertise to professional voice cloning.

PHILADELPHIA, PA, UNITED STATES, August 7, 2026 /EINPresswire.com/ -- BionicVO, the [professional voice cloning platform](#) founded by [Oink Ink Radio](#)'s Dan Price, launched publicly on August 5 at www.bionicvo.ai.

Dan Price, founder of Oink Ink Radio and managing member of BionicVO.

Price has spent 40 years making voices sell things. As founder of Oink Ink Radio, he has directed voice performances for Google, IBM, Ford, AT&T, NBC, and Staples, winning nearly a thousand industry awards along the way, including Cannes Lions, Clios, One Show Pencils, Radio Mercury Awards, and London International Awards.

“

AI voices aren't bad because the technology is bad. They're bad because no one is directing the performance. We built BionicVO to master these tools, not just use them.”

Dan Price, Founder and Managing Member, BionicVO

Now he is turning that expertise loose on AI.

BionicVO is built for creative teams that need AI efficiency without sacrificing the quality of real voice talent. Where much of the field offers synthetic, computer-generated voices, BionicVO uses real, professional voice actors. Every voice on the platform was hand-picked by Price because it is distinct, human, and authentic. These are working pros from Madison Avenue and Hollywood who have chosen to license their voices on their own terms.

What sets BionicVO apart is what happens before the user

ever touches the platform. Price and his engineering team apply 40 years of audio direction and sound design to the source audio itself, the same production methodology behind Oink Ink's

decades of award-winning campaigns. Users browse the actor roster, upload a script, generate a clone, and refine it in a built-in production studio.

"AI voices aren't bad because the technology is bad. They're bad because no one is directing the performance. We built BionicVO to master these tools, not just use them," said Dan Price, founder of Oink Ink Radio and managing member of BionicVO.

Every time a voice is used, the actor gets paid. BionicVO runs on a royalty model, not a synthetic voice bank. No fake voices. No stolen likenesses.

The global AI voice market is projected to reach \$21.75 billion by 2030. BionicVO enters it with a combination the rest of the field cannot match: a hand-picked roster of authentic voices, plus four decades of knowing how to direct them.

BionicVO is available now at www.bionicvo.ai. To schedule an interview with Dan Price, contact Lauren Harris at lauren@reliablepr.net.

About BionicVO

BionicVO is a professional voice cloning platform for creative teams that refuse to compromise on sound. Founded by veteran audio producer Dan Price of Oink Ink Radio, BionicVO combines a hand-picked roster of elite U.S. voice actors, source audio crafted by professional voice directors and sound designers, and ethical AI practices to deliver performances that sound intentional, human, and production-ready.
