

MOBI Technologies Expands Smart Solutions to Help Families Prepare for Back-to-School

Connected solutions for home security, family wellness, and caregiving help meet the changing needs of today's students and families.

LOS ANGELES, CA, UNITED STATES, August 11, 2026 /EINPresswire.com/ -- As families prepare for a new school year, daily routines become increasingly busy. Students return to classrooms and college campuses, parents balance work and family responsibilities, and caregivers manage the health and well-being of loved ones. To help simplify these everyday challenges, MOBI Technologies is expanding its portfolio of connected solutions designed to support families throughout the back-to-school season.

From protecting college dorm rooms to helping families monitor their homes and manage daily health routines, MOBI's connected products are designed to make everyday life easier through simple technology and app-based connectivity.

"As families prepare for a new school year, they're looking for more than traditional school supplies," said Kiumars Haziq, Sales Director at MOBI Technologies. "They're looking for solutions that help them stay connected, protect their homes, and simplify everyday routines. Our connected product portfolio was designed to help families feel prepared wherever life takes them."

One of the company's featured back-to-school solutions is the [MOBI Dorm Room Security Kit](#), created to help college students monitor their living spaces while attending classes, studying, or traveling home for the weekend. The solution combines a MobiCam MP, a Smart Door & Window Sensor, and a Smart Wi-Fi Light Bulb that work together through the MOBI Smart App to provide real-time alerts and remote monitoring.

Families need technology that fits into everyday life. Our connected solutions help people stay secure, healthy, and connected throughout the school year.”

MOBI Technologies*

For homeowners and growing families, the MobiCam MP 3-Camera Bundle and MobiCam MP 5-Camera Bundle provide flexible home monitoring solutions that allow users to view multiple rooms through a single mobile app. Whether checking on children after school, monitoring pets, or watching over entryways, the bundles help families stay connected from virtually anywhere.

Recognizing that back-to-school also brings changing healthcare routines, MOBI is highlighting its [Smart Wi-Fi Pill](#)

[Dispenser](#), a connected medication management solution designed to simplify daily medication schedules. Working through the MOBI Smart App, the dispenser allows users to create personalized reminders while enabling caregivers and family members to help manage medication routines remotely. The solution is particularly valuable for adults caring for aging parents while raising children—a growing group often referred to as the sandwich generation.

MOBI is also featuring its Smart Home Protection & Monitoring Bundle, which combines smart cameras, door and window sensors, and connected lighting into one integrated system. Working together through the MOBI Smart App, the devices help families receive notifications, automate routines, and monitor important areas of the home from a single platform.

All featured products are part of the growing MOBI Smart ecosystem, allowing users to manage compatible devices through one app. The platform simplifies setup, supports remote access, and helps families stay connected whether they are at home, at work, or away at school.

As connected home and digital health technologies continue to become part of everyday life, MOBI Technologies remains focused on developing practical solutions that address the evolving needs of modern families. By combining smart home security, connected caregiving, and personal wellness products into one ecosystem, the company continues to expand its commitment to making technology more accessible and easier to use.

The featured back-to-school solutions are available now through www.mobiusa.com and select retail partners.
