

Dr. Arani Medical Laboratory, LA's Pioneer in Rapid STD Testing and City of LA Award Recipient, Celebrates 20 Years

LOS ANGELES, CA, UNITED STATES, August 7, 2026 /

EINPresswire.com/ -- Dr. Arani Medical Laboratory, a Los Angeles-based clinical laboratory specializing in rapid sexually transmitted disease (STD) testing, is marking 20 years of operation this year alongside what the clinic reports was a 100 percent score on its most recent site inspection by public health officials. Arani Medical Lab serves patients across Los Angeles and Southern California, offering same-day test results as an alternative to the multi-day turnaround typical of large commercial laboratories.

Founded in 2006 by Dr. Siavash Arani, MD, the laboratory was built around a specific goal: developing testing procedures fast enough to give patients same-day results, same-day counseling, and same-day treatment when needed, rather than the days-long wait common at commercial labs.

"We are proud to have provided STD testing and treatment for the past 20 years, and we were among the first laboratories to deliver results such as a 20-minute syphilis test," said Dr. Siavash Arani, MD, founder of Dr. Arani Medical Laboratory. "Technology and procedure had to be adapted specifically to make that possible."

According to the clinic, current turnaround times include HIV results in as fast as 15 minutes, and syphilis, bacterial vaginosis, trichomonas, and herpes direct virology results in as fast as 20 minutes each.

Testing Capabilities Beyond Standard Commercial Labs

Arani Medical Lab also offers testing for non-gonococcal urethritis (NGU) and non-chlamydial NGU (NCNGU), conditions the clinic says many major commercial laboratories are not equipped to test for directly.

"Our laboratory is able to provide testing for NGU and NCNGU, which many major commercial

laboratories are unable to perform," said Dr. Arani. "NGU testing requires direct microscopic analysis, which depends on trained eyes and specific qualification."

The clinic said its testing accuracy is regularly validated through state-administered proficiency testing. "The state periodically provides unknown biological samples for proficiency testing, which validates the accuracy of our lab results," Dr. Arani said.

Recent Recognition

Arani Medical Lab said it recently received a perfect score on a site inspection conducted by public health officials. The clinic has also been recognized by the Los Angeles Mayor's office and City Council members, according to a video posted by the clinic documenting the recognition.

About Dr. Arani Medical Laboratory

Dr. Arani Medical Laboratory (also known as Arani Medical Lab) is a clinical laboratory in Los Angeles specializing in rapid STD testing, founded in 2006 by Dr. Siavash Arani, MD. The lab provides testing and same-day treatment options for conditions including HIV, syphilis, bacterial vaginosis, trichomonas, herpes, HPV, and NGU/NCNGU, serving patients throughout Los Angeles and Southern California.
