

Seatlr Plans to Launch a New Search Engine

The search engine is currently in development, with an initial release planned for September 2026.

KUWAIT CITY, KUWAIT, August 7, 2026 /EINPresswire.com/ -- [Seatlr](#) plans to launch a new global search engine, with an initial release planned for September 2026.

“

We're not trying to make the existing search experience slightly better. We're building our own answer to what search should be next.”

Ali Hadi

The search engine is currently in development and is being designed around a different approach to how people search, discover, and navigate information online.

"We're developing the search engine around our own approach to the search experience," said Ali Hadi, founder of Seatlr. "Our focus is on exploring different ways for people to discover and interact with information online."

Hadi previously founded Seatlr, a social travel platform that connects passengers through their flights and destinations and provides travel services around that shared experience. The new search initiative expands Seatlr's work into search technology.

Details about the platform, including its name, design, features, and approach to search, will be announced closer to its planned September 2026 launch.

About Seatlr

Seatlr is a technology platform focused on creating new ways for travelers to connect and interact around their journeys. Founded by Ali Hadi, Seatlr combines social travel experiences with technology designed to support connections and access to travel-related information.
