

# Zion Defense Group Launches New Website Featuring Modern Design, Improved Mobile Experience, and Expanded Service Info

*A faster, mobile-friendly website with expanded service information makes it easier to explore Zion Defense Group's customized security solutions.*

CLEMMONS, NC, UNITED STATES, August 7, 2026 /EINPresswire.com/ -- [Zion Defense Group](#) is pleased to announce the launch of its newly redesigned website, providing visitors with a faster, more informative, and mobile-friendly online experience that better reflects the company's commitment to delivering professional security and protective services.

The new website was developed to make it easier for prospective clients to learn about the company's capabilities, explore its range of services, and connect with experienced security professionals. With more people researching businesses on smartphones and tablets than ever before, the redesigned site offers a significantly improved mobile experience while maintaining fast page loading speeds and intuitive navigation across all devices.

“

Our new website does a much better job of representing who we are and how we serve our clients”

*Wayne Sankey*

In addition to its modern design, one of the most significant improvements is the depth of information now available to visitors. The previous website primarily presented a list of services with limited supporting content. The new website expands on each service with detailed descriptions that explain what is offered, how each service works, and the types of clients who can benefit from Zion

The logo for Zion Defense Group, featuring the words "ZION", "DEFENSE", and "GROUP" stacked vertically in a large, gold-colored, serif font.

Defense Group's customized security solutions.

Visitors can now find comprehensive information on [executive protection](#), estate security, security consulting, transportation security, transportation of valuable goods, and [Technical Surveillance Countermeasures \(TSCM\)](#) services designed to detect and neutralize unauthorized electronic surveillance devices. The expanded content helps individuals, businesses, organizations, and places of worship better understand the company's approach to assessing risks and developing customized security strategies tailored to their unique circumstances.

Wayne Sankey - Founder of Zion Defense Group

"Our new website does a much better job of representing who we are and how we serve our clients," said Wayne Sankey, founder of Zion Defense Group. "We wanted to create an online experience that is easy to navigate, works seamlessly on every device, and gives visitors meaningful information instead of simply listing the services we provide. Whether someone needs executive protection, security consulting, TSCM services, or another specialized security solution, they can now gain a much clearer understanding of how we can help."

The redesigned website also emphasizes accessibility and usability. Simplified navigation allows visitors to quickly locate the information they need, while the streamlined layout provides a cleaner, more professional appearance that reflects the high standards Zion Defense Group brings to every client engagement. Faster loading pages further improve the overall experience, allowing visitors to access important information without unnecessary delays.

Founded by law enforcement veteran Wayne Sankey, Zion Defense Group has built a reputation for providing professional security solutions with integrity, discretion, and attention to detail. The company serves clients throughout North Carolina and South Carolina, offering customized services designed to meet the needs of executives, private individuals, businesses, faith-based organizations, and others seeking reliable security expertise.

Every security situation is unique, which is why Zion Defense Group focuses on developing personalized strategies rather than one-size-fits-all solutions. From executive protection and estate security to Technical Surveillance Countermeasures (TSCM), transportation security, and security consulting, the company works closely with clients to identify potential risks and

implement practical measures that enhance safety, privacy, and peace of mind.

The launch of the new website represents another step in Zion Defense Group's ongoing commitment to providing exceptional client service both online and in the field. By combining a modern visual design with expanded educational content and an improved user experience, the company aims to make it easier than ever for prospective clients to understand their options and confidently take the next step toward protecting what matters most.

Visitors are encouraged to explore the new website and learn more about Zion Defense Group's full range of professional security services by visiting <https://www.ziondefensegroup.com>.
