

EnviroTech Solutions Expands Asbestos Abatement Services in Kissimmee, FL

Florida-licensed asbestos abatement company expands certified services to Kissimmee and Osceola County homeowners and commercial property managers.

KISSIMMEE, FL, UNITED STATES, August 13, 2026 /EINPresswire.com/ --

[EnviroTech Solutions](#), a Florida-licensed environmental remediation company based in Groveland, is now providing professional asbestos abatement services to homeowners and

commercial property managers throughout Kissimmee and Osceola County. The company's expansion into this rapidly growing Central Florida market reflects increased demand for certified hazardous material remediation as the region continues to age and develop.

Kissimmee is home to thousands of residential and commercial properties constructed before 1980 -- the era during which asbestos-containing materials were routinely incorporated into building products such as popcorn ceiling texture, vinyl floor tile adhesives, pipe insulation, joint compounds, and roofing materials. Florida's subtropical climate compounds the risk. Persistent high humidity, intense seasonal heat, and the annual threat of hurricanes accelerate the deterioration of older building components. When asbestos-containing materials become friable and disturbed, microscopic fibers can become airborne and pose serious long-term health risks to occupants, workers, and contractors.

Property owners in Kissimmee who need [asbestos abatement services in Kissimmee, FL](#), now have access to EnviroTech Solutions' full remediation process, which includes initial inspection and testing, containment using negative air pressure systems, professional removal and disposal in accordance with EPA and OSHA standards, and final clearance testing to confirm the property is safe for re-occupancy. The company holds a Florida Licensed Asbestos Abatement Business designation and employs IICRC-certified technicians on every project.

Osceola County residents and commercial property managers seeking [asbestos abatement](#)

Asbestos Abatement Services in Kissimmee, FL

[services in Kissimmee, Florida](#), are encouraged to reach out directly to schedule a free consultation. The EnviroTech Solutions team serves Kissimmee as part of its broader coverage across Orange, Lake, Seminole, and Osceola Counties, with field technicians available around the clock for emergency response.

"Kissimmee is one of the most dynamic growth communities in Central Florida, and a significant portion of its housing and commercial stock dates back to the decades when asbestos was a standard construction material," said Rob Kennedy, owner of EnviroTech Solutions. "We want every property owner in Osceola County to know they have a licensed, certified team they can call before any renovation or demolition project begins."

EnviroTech Solutions offers free consultations for property owners with questions about asbestos risks. The company works with all major insurance companies to help clients navigate the claims process and also offers financing through Hearth, making professional remediation accessible for property owners across all budget levels. Whether a homeowner is planning a kitchen renovation, a contractor has encountered suspect materials on a job site, or a property manager needs clearance testing before a tenant transition, the company provides the expertise to handle every situation safely and efficiently.

Residents and property managers in Kissimmee, Osceola County, and the surrounding region are encouraged to contact EnviroTech Solutions at 321-758-9787 to schedule a free consultation.
