

Columbus Technology Firm Ranks Among the Nation's Top 0.5% for 4th Consecutive Year

Astute Technology Management has earned the national distinction by helping businesses stay ahead of emerging cyber threats and technologies.

COLUMBUS, OH, UNITED STATES, August 7, 2026 /EINPresswire.com/ -- Astute Technology Management, a provider of IT and [cybersecurity services](#), is now among a small number of companies in the country to make the MSP 501 list for 4 years in a row.

Logo for Astute Technology Management

Every year, Channel Dive (formerly Channel Futures), a media and events platform that represents the IT industry, conducts an extensive survey of [managed service providers](#), cloud computing companies, telecom firms, and the broader IT industry. The result of that survey is a list of IT companies that excel not just in revenue growth, but in operational efficiency and overall business health.

“

Technology is a means to an end for most businesses. Business leaders want to stay competitive, work smarter, and reduce risk; that's what matters to them.”

Eric Madden

President of Astute Technology Management, Eric Madden, had this to say about the recognition:

“Technology is a means to an end for most businesses. Business leaders want to stay competitive, work smarter, and reduce risk; that's what matters to them. Whether we're working with a construction, engineering, architecture, or manufacturing firm, we focus on translating their high-level goals into an actionable plan

and supporting them through that journey. I think that focus on business outcomes—not just technology outcomes—is what's enabled us to create this success.”

Astute Technology Management's expertise in information security plays a particularly important part of that success.

Public and private entities across the Midwest are focusing resources on bolstering cybersecurity protections. This includes Ohio House Bill 96, which Governor DeWine signed last year to establish mandatory cybersecurity standards and employee training programs for local political subdivisions.

Specifically, it requires many of the same things—cybersecurity framework alignment, threat detection, incident reporting—that the Astute team provides to its clients. Kane Tabor, Vice President, had this to say about the increasing importance of cybersecurity:

“Cybersecurity changes every day, and AI has changed the dynamic between criminals and defenders. Today, criminals can launch a sophisticated ransomware attack with just the click of a button—that would have taken weeks of planning just a few years ago. Because the landscape has changed so fast, we commit a lot of time and energy to help our clients understand how their security needs to evolve along with it. Good security isn’t just about technology; it’s about people, processes, and the overall business operation. That holistic approach is our focus.”

Columbus has become one of the country’s thriving hubs for technology innovation and talent. Astute Technology Management has greatly benefited from that pool of talent, hiring new staff in both technical and non-technical roles throughout the year to maintain its growth.

About Astute Technology Management - Since 1998, Astute Technology Management has been providing IT management and support to small and mid-sized businesses in Ohio. The company’s focus on deep and authentic client relationships has earned them an extremely high 98% customer satisfaction rating.
