

InstantGMP™ Publishes Transparent Module and Bundle Pricing for Global Manufacturing Platform Software

CARY, NC, UNITED STATES, August 11, 2026 /EINPresswire.com/ --

InstantGMP™, a leading provider of cloud-based manufacturing, inventory, quality, and lab management software, today announced the publication of transparent pricing across its entire platform. Manufacturers can now see exact annual pricing for every individual software module as well as for InstantGMP's pre-configured, all-in-one bundles, without scheduling a sales call first.

Real Numbers, No Sales Call Required

Most GMP and quality management software vendors require a demo before disclosing a single number, leaving growing manufacturers unable to budget

We wanted manufacturers to be able to price out exactly what they need, whether that's a single module or our full platform, before they ever get on a call with us."

Dr. Richard Soltero

until they've already committed time to a sales process. InstantGMP is taking the opposite approach, publishing real starting prices for every core product directly on its website, so operations teams can evaluate cost against need from the very first visit.

Module Pricing: Pay Only for What You Need

For manufacturers who only need one or two capabilities, InstantGMP now offers a full breakdown of module-by-

module pricing, with every module including the first 5 users. Individual modules include Batch Records and Inventory Management at \$20,000/year each, Quality Management at \$15,000/year, Quality Control and Document Management at \$12,000/year each, and Room and Equipment Control, Learning Management, and the MCP Server at \$9,000/year each. A manufacturer

purchasing every module individually would pay \$115,000/year in total.

Bundle Pricing: Save by Combining Modules

For manufacturers who need several capabilities together, InstantGMP's pre-configured bundles combine the most common module groupings at a lower combined price than licensing each module separately. InstantGMP PRO, the company's all-in-one platform spanning electronic batch records, inventory, quality management, quality control, document control, and learning management, starts at \$57,900/year. Other bundles include InstantGMP MES starting at \$37,000/year, InstantGMP EBR starting at \$28,900/year, and InstantGMP INV, QMS, and LIMS each starting at \$22,900/year.

"We wanted manufacturers to be able to price out exactly what they need, whether that's a single module or our full platform, before they ever get on a call with us," said Dr. Richard Soltero, President of InstantGMP. "Transparent pricing removes the guesswork that keeps growing manufacturers from budgeting for compliance software in the first place."

Manufacturers can also schedule a demo to receive an exact quote based on their specific module mix and user count.

About InstantGMP™, Inc.

Founded by pharmaceutical industry veteran Dr. Richard Soltero, InstantGMP, Inc., offers affordable all-in-one manufacturing, inventory, and quality software. The company's Global Manufacturing Platform simplifies the documentation and approval procedures for quality processes that keep all quality documentation organized in electronic format while providing for quality checks and workflow processes to make compliance easy.
