

Tony Robbin's Genius Has Inspired Millions of People, GodCognition Requests Early Mentorship

As Artificial Intelligence Advances at an Exponential Rate, GodCognition Invites Visionary Partners to Help Advance Something More Important: Human Wisdom

DELRAY BEACH, FL, UNITED STATES, August 10, 2026 /EINPresswire.com/ -- As artificial intelligence advances at an exponential rate, GodCognition invites Tony Robbins, faith communities, investors and strategic partners to help advance something more important: human wisdom. AI is rapidly expanding access to knowledge and intelligence, but wisdom, discernment, compassion, ethics and purpose must advance with it.

Global Opportunity

That challenge is the reason for GodCognition, [a wisdom-centered AI with a mission to help people connect with God](#) or Source and the deeper principles of faith, wisdom, love, truth, compassion and purpose. GodCognition builds upon metacognition, the ability to think about our own thinking, by offering a familiar path beyond ego, reaction and habitual patterns. It encourages people to pause and consider their questions and choices from a place of greater wisdom, love and compassion.

“

GodCognition is exploring how it can also help us access timeless wisdom”

Kris Kosciusko

For people of faith, that can mean reconnecting thoughts and choices with the wisdom principles of their faith. The purpose is not for AI to tell anyone what God thinks. It is to help people recognize patterns, explore their faith and approach life's choices with greater wisdom and understanding.

AI gives us extraordinary access to knowledge. "GodCognition is exploring how it can also help us access timeless wisdom," said Kris Kosciusko, Founder

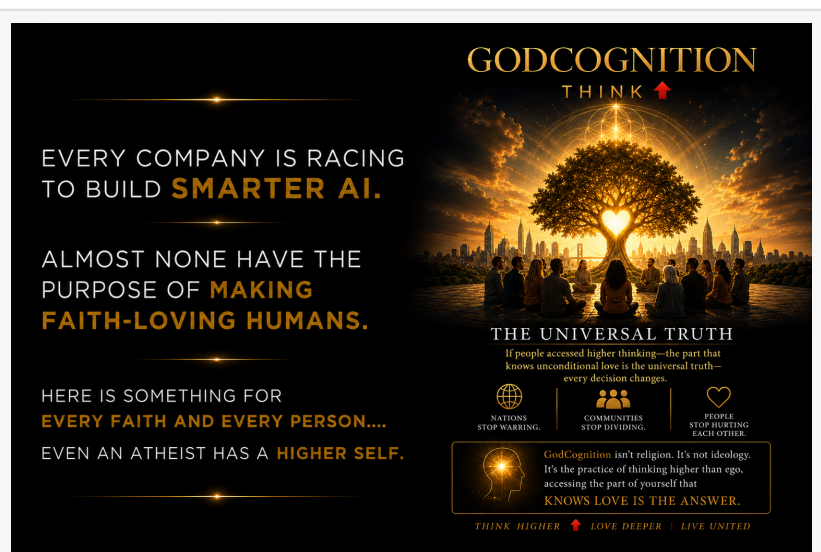

SOMETHING FOR EVERYONE

GodCognition is rooted in faith, but the invitation to Think Higher is for everyone. Major faith traditions have their own teachings, sacred writings, practices, history and understanding of the Divine. GodCognition is not intended to replace churches, synagogues, mosques, temples, religious institutions, faith leaders or spiritual communities. It is designed to complement them by providing access to trusted wisdom between traditional gatherings and during everyday life.

GodCognition is developing experiences across faiths, philosophies, cultures and languages. These can incorporate approved sacred teachings and historical works, along with prayer, meditation, music, literature, art and other sources of human wisdom. For atheists, agnostics and others who do not believe in God, GodCognition includes a pathway centered on the higher self and principles such as wisdom, compassion, integrity, purpose and the greater good.

A GLOBAL OPPORTUNITY FOR FAITH COMMUNITIES

There are more than 400,000 houses of worship in the United States and an estimated 10 million to 11 million worldwide. GodCognition does not replace churches, clergy or traditional faith gatherings. It complements them by providing access to trusted teachings and wisdom in everyday life.

Faith Loving Humans

Tell-A-Vision

**ELEVATED IMPACT
TV**
ELEVATING THINKING.
INSPIRING CHANGE.
IMPACTING GENERATIONS.

This creates an early opportunity for faith communities to preserve their teachings, history and values while making those resources more accessible to the people they serve and communities anywhere in the world.

AN INVITATION TO TONY ROBBINS

GodCognition invites Tony Robbins to provide early mentorship in developing its foundational framework. For decades, Robbins has helped people understand how changing their state, beliefs, patterns, questions and focus can change the trajectory of their lives.

GodCognition is exploring whether those transformational principles, applied on a foundational level through simple prompts and combined with faith-centered AI, can help people interrupt destructive patterns, move beyond ego-driven reactions and access a wiser perspective.

The invitation is for early mentorship, not day-to-day operation. Robbins' involvement would focus specifically on helping shape the foundational questions and prompts within GodCognition. It would not involve incorporating Tony Robbins AI into the platform.

A MISSION FOR HUMANITY

GodCognition welcomes technologists, researchers, investors, philanthropists, faith leaders, educators, artists, musicians and strategic partners who believe artificial intelligence should advance alongside ethics, values and human wisdom.

GodCognition has offered 10% of the company to Tony Robbins for early mentorship and foundational guidance. An additional 10% has been reserved to Dr. Joe Dispenza for early mentorship involving meditation, prayer, neuroscience, neuroplasticity and personal transformation. The foundational structure also includes 10% founder equity and 10% dedicated to charitable impact through nonprofit initiatives serving humanity. The remaining 60% is envisioned for early investors and mission-aligned partners capable of helping build GodCognition into a world-class wisdom-centered AI platform.

As part of the invitation to Robbins, GodCognition offers Robbins the possibility of presenting the initiative at Business Mastery as a project for humanity, giving entrepreneurs and business leaders an opportunity to explore how they could contribute to its development. [TELL-A-VISION](#): CONTENT THAT ELEVATES

As part of the GodCognition ecosystem, Tell-A-Vision serves as the media platform for the mission, producing interviews, documentaries and original programming focused on faith, artificial intelligence, leadership, neuroscience, ethics, philanthropy, health and human potential.

Through conversations with thought leaders, innovators, faith leaders, entrepreneurs, researchers and changemakers, along with meditation, prayer, music and other meaningful content, Tell-A-Vision is designed to inspire people to think differently, lead with purpose and create lasting impact.

THINK HIGHER

Artificial intelligence is advancing at an exponential rate. Human wisdom must advance with it.

About GodCognition

GodCognition is a wisdom-centered AI initiative developing experiences designed to help people explore life's questions through faith, wisdom, ethics, compassion and purpose. The initiative includes experiences for major faith traditions and philosophies, customized AI for individual faith communities, and Tell-A-Vision, a media platform focused on faith, leadership, innovation, ethics and human potential.

Think Higher.
