Services

COLUMBIA, MD, UNITED STATES, August 11, 2026

/EINPresswire.com/ -- DP Solutions, a leading managed IT and cybersecurity provider serving organizations

throughout the Mid-Atlantic, announced it has achieved Cybersecurity Maturity Model Certification (CMMC) Level 2, demonstrating its commitment to protecting sensitive information and maintaining the highest standards of cybersecurity for its clients.

“

Cybersecurity and compliance are business priorities, not just IT priorities. Achieving CMMC Level 2 shows that we hold ourselves to the same high standards we help our clients achieve every day.”

*Melissa Bryant, President of
DP Solutions*

[CMMC Level 2 is a cybersecurity certification](#) established by the U.S. Department of War (DoW) for organizations that store, process, or transmit Controlled Unclassified Information (CUI). The certification validates the implementation of 110 security requirements based on NIST SP 800-171 and is designed to strengthen cybersecurity across the Defense Industrial Base.

For organizations supporting the DoW, achieving and maintaining [CMMC compliance](#) is increasingly important for participating in government contracts and demonstrating the ability to safeguard sensitive information.

"Cybersecurity and compliance have become business priorities, not just IT priorities," said Melissa Bryant, President of DP Solutions. "Achieving CMMC Level 2 demonstrates that we're holding ourselves to the same high standards we help our clients achieve every day. We're proud to provide the expertise, guidance, and security-first mindset organizations need to operate with confidence."

The certification not only validates DP Solutions' internal cybersecurity controls but also strengthens the company's ability to support defense contractors, manufacturers, government suppliers, and other organizations required to protect CUI and comply with cybersecurity

regulations.

For prospective and current clients, CMMC Level 2 certification provides assurance that DP Solutions has implemented and been assessed against a comprehensive set of security controls covering areas such as access management, incident response, risk assessment, system monitoring, multi-factor authentication, and data protection.

"Effective cybersecurity requires disciplined processes, documented controls, and a culture of accountability. Our clients trust us with critical systems and sensitive data every day, and organizations need confidence that their partners can properly protect that data," said Ron Connelly, Chief Information Security Officer at DP Solutions. "Achieving CMMC Level 2 validates the maturity of our security program and demonstrates our ability to protect sensitive information. That's important not only for our organization, but for every client who relies on us as a trusted technology partner."

As more organizations face growing cybersecurity requirements from customers, regulators, and government agencies, the need for trusted technology partners has never been greater. Achieving CMMC Level 2 reinforces DP Solutions' ability to help clients protect sensitive information, reduce risk, and confidently navigate evolving compliance requirements while building secure, resilient technology environments.

About DP Solutions

DP Solutions is a family-owned, award-winning managed IT and cybersecurity provider headquartered in Columbia, Maryland. Since 1971, the company has helped organizations throughout the Mid-Atlantic improve productivity, reduce risk, and achieve their business goals through managed IT services, cybersecurity, cloud solutions, compliance consulting, strategic IT planning, and a locally staffed 24x7 Service Desk.
