

SysInfoTools Launches SharePoint Migration Software for Secure Data Transfer

SysInfoTools launches SharePoint Migration Software for secure SharePoint and Microsoft 365 migrations with files, metadata, versions, and permissions.

NOIDA, UTTAR PRADESH, INDIA, August 11, 2026 /EINPresswire.com/ --

SysInfoTools, a provider of data recovery and cloud migration solutions, has announced the launch of its new [SharePoint Migration Software](#), designed to simplify the transfer of SharePoint data while maintaining folder structures, metadata, document properties, version history, and user permissions.

SharePoint Migration Software for secure transfer of files, folders, metadata, versions, and permissions.

“

Businesses need secure migrations without losing documents or permissions. Our SharePoint Migration Software helps preserve business data, folder structures, metadata, and access settings.”

Mrs. Sonika Rawat, CEO of SysInfoTools

SharePoint migrations can become challenging when organizations need to move large volumes of business-critical data between environments. Complex folder hierarchies, document libraries, metadata, versions, and permissions can make traditional migration processes time-consuming and increase the risk of data inconsistencies.

The new SysInfoTools [SharePoint Migration](#) Software provides organizations with a streamlined solution for moving SharePoint data efficiently. It supports bulk migration of files, folders, document libraries, and SharePoint sites, making it suitable for organizations planning tenant-to-tenant migrations, SharePoint restructuring, mergers and acquisitions, or broader

Microsoft 365 modernization projects.

Key Features of SysInfoTools SharePoint Migration Software

Preserves folder hierarchy and document organization during migration
Maintains metadata and document properties
Supports preservation of document version history
Helps retain user permissions and access structures
Enables bulk migration of files, folders, libraries, and sites
Supports SharePoint and [Microsoft 365 migration](#) requirements
Designed for Windows 10 and Windows 11 environments
Provides an easy-to-use interface for technical and non-technical users

The software is designed to help IT administrators, enterprises, educational institutions, government organizations, managed service providers, and businesses manage SharePoint migration projects with greater confidence and efficiency.

“Businesses cannot afford to lose critical documents or disrupt carefully configured permission structures during migration,” said Mrs. Sonika Rawat, CEO of SysInfoTools. “We developed our SharePoint Migration Software to make the migration process more manageable while helping organizations preserve important business data and its associated structure.”

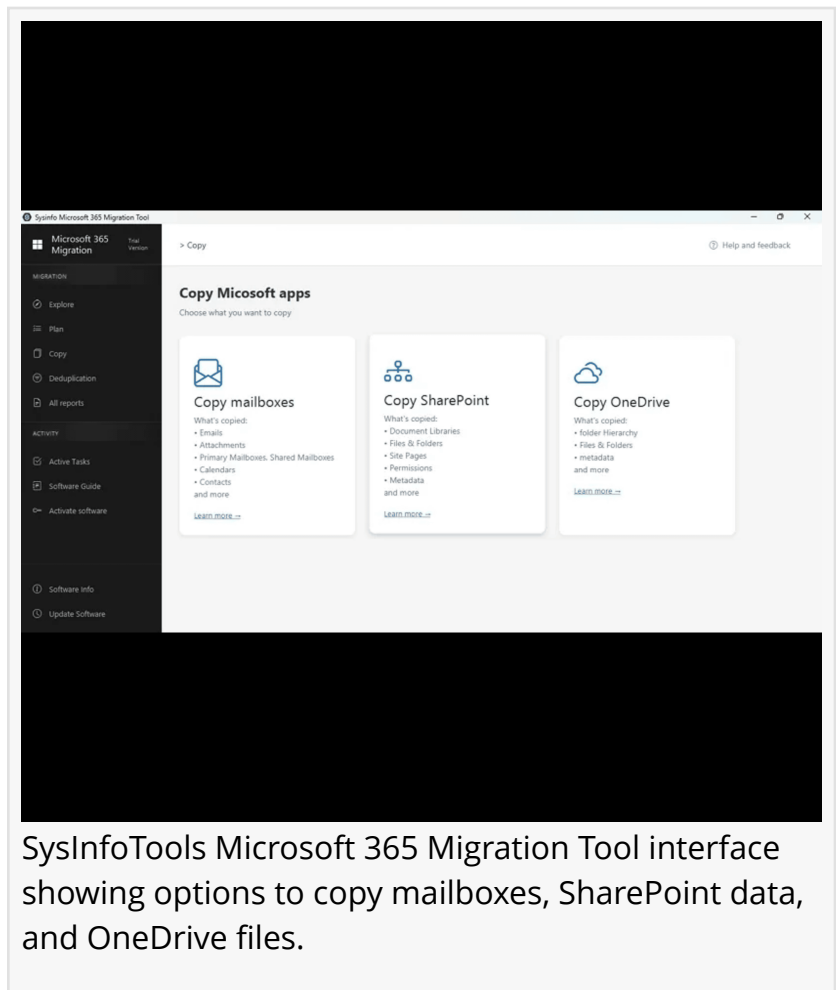

SharePoint Migration Software can be particularly useful for organizations moving data between Microsoft 365 tenants, consolidating SharePoint environments, reorganizing sites, or transitioning as part of a merger or acquisition.

The solution is now available with a free demo version, allowing users to evaluate its capabilities before purchasing a full license.

Organizations interested in learning more about the software can visit the official product page:
