

ASAP Semiconductor Announces Its Approval as a Supplier for Northrop Grumman Corporation

California-based parts distributor ASAP Semiconductor announces approval as a supplier for Northrop Grumman, promising dedicated fulfillment support.

ANAHEIM, CA, UNITED STATES, August 10, 2026 /EINPresswire.com/ -- The California-based aerospace, defense, and electronic parts distributor ASAP Semiconductor proudly announced today its approval as a supplier for [Northrop Grumman Corporation](#) (NGC), marking a major step in the company's wider efforts to support American aerospace and defense

organizations in the face of heightened supply-chain pressures and market scarcity. As the two strengthen their business relationship, ASAP Semiconductor states that it is fully committed to providing Northrop Grumman with a range of dependable procurement services tailored to the company's evolving requirements, such as leveraging its expedited fulfillment capabilities and

“

Our team looks forward to providing Northrop Grumman with the hands-on fulfillment support and rigorous quality standards that have long defined our organization.”

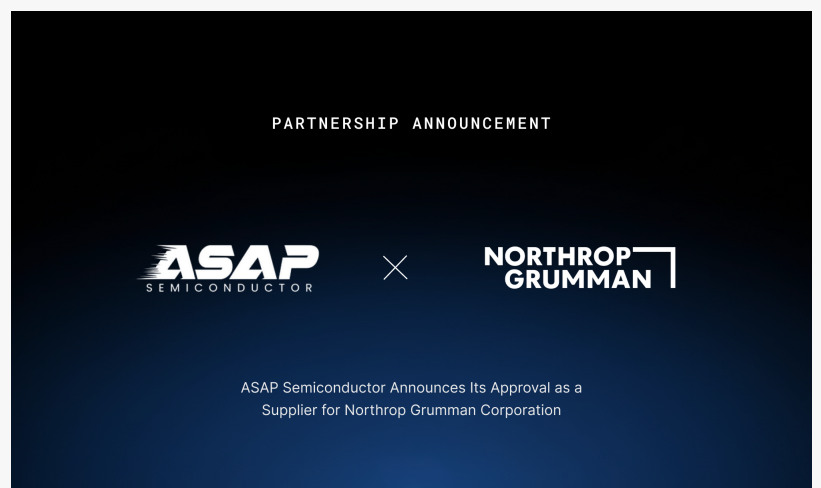

Joe Faruqui, CEO of ASAP Semiconductor

data-driven project management solutions to effectively address routine procurement activities and time-sensitive needs alike.

A Glance at Northrop Grumman Corporation

Headquartered in Falls Church, Virginia, Northrop Grumman Corporation stands as one of the world's leading multinational aerospace and defense technology companies, tracing its lineage through highly-regarded predecessors like Northrop Corporation and Grumman Corporation. Through its Aeronautics Systems, Defense

Systems, Mission Systems, and Space Systems segments, NGC designs and manufactures

ASAP Semiconductor Announces Its Approval as a Supplier for Northrop Grumman Corporation

advanced equipment that span from stealth aircraft and uncrewed platforms to strategic missile systems, advanced sensors, and space exploration technologies. For organizations supporting national security and critical aerospace programs, maintaining access to reliable parts has quickly become a major concern as rising global conflict, sourcing limitations, and other external pressures affect conventional procurement channels. With the vast majority of its portfolio being dedicated to fulfilling the needs of demanding, multi-year government contract acts and aerospace projects, Northrop Grumman and others will commonly address supply needs and logistical concerns with the help of a trusted network of suppliers and distributors.

The Role of ASAP Semiconductor

Since its establishment in 2009, ASAP Semiconductor has cultivated a reputation as a global parts distributor and solutions provider, its inventory encompassing an [array of aerospace](#), defense, civil aviation, electronic, [industrial automation](#), and IT hardware components sourced from vetted vendors and manufacturers. With major tenets of operation being centered around the extent of its inventory options, speed of service, and ability to provide targeted procurement support, ASAP Semiconductor's customer base includes defense contractors, Fortune 500 corporations, U.S. Government departments and agencies, airframe manufacturers, MRO facilities, and various others.

To successfully serve the specialized needs of aerospace and defense companies in particular, the distributor attests that it has continually invested in strengthening its quality assurance protocols and data-driven procurement strategies to navigate strict regulatory landscapes and mitigate potential logistical bottlenecks. This includes working to locate difficult-to-source, obsolete, or otherwise constrained components when standard purchasing channels may not provide an effective path to fulfillment, allowing the distributor to support more challenging requirements that other channels may fail to solve. Paired with ASAP Semiconductor's history of dependable service with numerous defense organizations and major aerospace manufacturers, the distributor has established the standing and capability necessary to reliably meet the procurement demands of prime contractors like Northrop Grumman Corporation.

"We at ASAP Semiconductor are proud to be approved as a supplier by Northrop Grumman Corporation, this milestone bringing our companies closer together in strengthened partnership and trust," stated Joe Faruqui, CEO of ASAP Semiconductor. "Our team looks forward to providing Northrop Grumman with the hands-on fulfillment support and rigorous quality standards that have long defined our organization, ensuring seamless procurement solutions that drive long-term operational success."

Expanding Industry Collaboration and Partnerships

As global aerospace and defense organizations face a surge of requirements in the face of rising conflict and shifting industry priorities, the role of dependable procurement partners will remain critical. Having similarly garnered recent approval as a supplier for other prominent aerospace and defense manufacturers alongside Northrop Grumman, the distributor states that it is

furthering its efforts this year to expand its footprint across aerospace and military market sectors, endeavoring to address a rising need for steady supply availability and options for hard-to-find products. Building upon this positive trajectory, ASAP Semiconductor looks forward to closely collaborating with Northrop Grumman, paving the way for a sustained, long-term relationship that delivers measurable value and support for the industry leader.

About ASAP Semiconductor

Established in 2009, ASAP Semiconductor is a global distributor specializing in aerospace, aviation, defense, marine, electronic, industrial, and IT hardware components. Serving a diverse customer base that includes U.S. Government departments and agencies, Fortune 100 companies, major air carriers, original equipment manufacturers, and repair stations, the company is recognized for its expansive inventory, rigorous quality assurance practices, and commitment to efficient procurement solutions.
