

QuietGrowth develops design method for illustrating growth and defensive ranges of a portfolio

An intuitive visual method to help the clients better understand the portfolio management activity.

SYDNEY, NEW SOUTH WALES, AUSTRALIA, August 31, 2026 /EINPresswire.com/ -- QuietGrowth has designed an intuitive method to illustrate the minimum and maximum allocation constraints for a portfolio's growth and defensive components. Now one can see, at a glance, the allocation ranges of a portfolio in a single image. QuietGrowth hopes this simple yet meaningful visual method it developed will help its clients better understand its portfolio management activity.

QuietGrowth has released three examples to illustrate the design method. The examples consider only two components, growth and defensive, and not a possible third component of hybrid. That is, all assets are classified into one of two components: growth and defensive.

Illustration example 1 in the image shows that the allocation range for the growth component in the target portfolio is 61% to 75%. Accordingly, the allocation range for the defensive component of the same portfolio is 25% (100% minus 75%) to 39% (100% minus 61%).

Here, Defensive minimum = 100% minus Growth maximum; Defensive maximum = 100% minus

Growth minimum.

Illustration example 2 in the image shows that the allocation range for the growth component in the target portfolio is 0% to 43%. Accordingly, the allocation range for the defensive component is 57% (100% minus 43%) to 100% (100% minus 0%).

Illustration example 3 in the image shows that the allocation range for the growth component in the target portfolio is 87% to 100%. Accordingly, the allocation range for the defensive component is 0% (100% minus 100%) to 13% (100% minus 87%).

This design approach for the QuietGrowth Portfolios has already been adopted in its 'Growth vs Defensive' communications. For more information about QuietGrowth's Australian automated investment management service, please visit www.quietgrowth.com.au.

About QuietGrowth:

QuietGrowth is an Australian digital investment management service or robo adviser. We manage the investments of clients with the aim of achieving risk-optimised returns over the long term.

In Australia, QuietGrowth provides personalised investment advice and manages the funds that the firm invests on behalf of the client. We offer customised and diversified portfolios to the client through a Managed Discretionary Account (MDA). The securities are held under the client's own individual Holder Identification Number (HIN). We support individual, joint, SMSF, trust, and company account types.

Our highly skilled investment experts and engineering teams have built the robo advice solution that uses algorithms and interactive interfaces to provide a high-quality automated service.

We have been serving clients through the MDA robo advice since 2015. Our website: www.quietgrowth.com.au
