

# ExpertPages® Releases New Data on AI Adoption in Litigation: 35% of Expert Witnesses Now Using Generative AI Tools

*Follow-Up to the 2026 Top Line Report Reveals How AI is Driving Productivity, Despite High Concerns Over "Hallucinations"*

SAUSALITO, CT, UNITED STATES, August 13, 2026 /EINPresswire.com/ -- Following its recent

“

As litigation complexity grows, the integration of AI is becoming an increasingly important factor in maintaining a cutting-edge practice.”

*Gerry H. Goldsholle, Founder  
& CEO*

release highlighting record-high hourly fees, ExpertPages® today published an exclusive follow-up dataset from its 2026 Expert Witness Fees & Practices Survey, focusing on the rapidly evolving role of Artificial Intelligence in litigation consulting.

The new data reveals that 35% of surveyed expert witnesses now utilize generative AI tools to assist in their professional work. While the majority of experts (65%) have not yet integrated AI into their practices, those who have report significant gains in efficiency, signaling a

foundational shift in how legal expertise is prepared and delivered.

“AI is no longer just a talking point in tech circles; it has officially entered the expert witness landscape,” said Gerry H. Goldsholle, Founder and CEO of Advice Company, ExpertPages’ parent. “While experts are understandably cautious about the risks, early adopters are finding profound competitive advantages in speed and data analysis. As litigation complexity grows, the integration of AI is becoming an increasingly important factor in maintaining a cutting-edge practice.”

## Key Findings from the 2026 AI Dataset

The follow-up report provides an in-depth look at how generative AI is altering expert practices:

- **Adoption Rates Growing Quickly:** Over one-third (35%) of experts use generative AI tools, with 24% adopting them within the past year and 11% having utilized them for more than a year.
- **Top Use Cases:** AI is most frequently deployed for research and literature review (32%). Other

prominent uses include drafting or editing reports (14%), reviewing opposing experts' reports (12%), and data analysis/trend identification (11%).

- **Massive Efficiency Gains:** Among the experts using AI, 78% report a positive impact on their productivity, with 47% noting a slight increase and 31% experiencing a significant boost.
- **High Awareness of Risks:** Accuracy remains a focal point; 81% of respondents express concern over AI "hallucinations" or inaccuracies. However, a proactive majority (57%) report having strict processes in place to mitigate these risks, while 24% view them as a major ongoing concern.
- **Strong Confidence in the Future:** On a scale of 1 to 10, experts expressed a median confidence score of 7.1 that AI will play an increasing role in expert witness work moving forward.

## Navigating a Changing Legal Landscape

The 2026 survey reinforces that while expert witness work remains a highly specialized and deeply experienced profession—with 83% of experts holding over a decade of experience—the tools of the trade are shifting. The data indicate that legal professionals should expect AI to play an increasingly supportive role behind the scenes in report preparation, data ingestion, and case strategy.

The AI-focused dataset, along with the previously released fee metrics, can be accessed through ExpertPages' insights portal. The full, comprehensive cross-tabulated report, featuring deep dives by practice area, will be released in the coming weeks.
