

Pre Action Fire Launches Broomfield Fire Alarm Monitoring Services for Local Businesses

Family-owned Denver fire protection company brings NICET-certified, 24/7 fire alarm monitoring to Broomfield commercial properties.

DENVER, CO, UNITED STATES, August 13, 2026 /EINPresswire.com/ -- [Pre Action Fire](#), Inc. today announced the expansion of its fire alarm monitoring services to Broomfield, Colorado, giving local business owners and property managers access to round-the-clock life safety monitoring backed

by NICET-certified technicians. The announcement reflects the company's ongoing commitment to protecting commercial properties across the Denver metro and Front Range region.

Pre Action Fire, founded in 2009, has spent more than fifteen years building a reputation as a family-owned fire protection provider serving commercial and residential clients throughout the Denver Metro area. With the launch of dedicated [Broomfield fire alarm monitoring services](#), the company extends its UL-listed monitoring network to a growing commercial corridor along the US 36 technology and business hub.

Broomfield has seen steady growth in office parks, retail centers, and light industrial facilities in recent years, and with that growth comes an increased responsibility for property owners to maintain code-compliant fire detection systems. Pre Action Fire's monitoring services are designed to meet NFPA 72 standards and Colorado State Fire Marshal requirements, ensuring that alarm signals are received and routed to emergency services without delay. The company's monitoring centers operate continuously, and technicians remain on call for same-day service when a system requires immediate attention.

Every technician on the Pre Action Fire team holds NICET certification, a credential that reflects rigorous training in fire alarm system design, installation, and monitoring protocols. This certification, combined with the company's status as an NFPA member organization, allows Pre Action Fire to service a wide range of commercial buildings, including multi-tenant offices, warehouses, educational facilities, and healthcare properties in Broomfield and the surrounding Front Range communities.

Broomfield Fire Alarm Monitoring

"Every business in Broomfield deserves the same level of protection and responsiveness we provide across the rest of the Denver Metro area," said a company spokesperson. "Our goal has always been to be the most reliable fire protection company in Denver, and that means showing up quickly, staying compliant with the latest codes, and never leaving a client without monitoring coverage."

The company's monitoring package includes real-time alerts, detailed system status reporting, and coordinated dispatch protocols that notify emergency services the moment a signal is received. Fire alarm monitoring works alongside other core Pre Action Fire services, including fire sprinkler installation, fire suppression systems, fire pump inspection, and fire extinguisher inspection, giving Broomfield property owners a single point of contact for full lifecycle fire protection. Systems are evaluated for wet pipe, dry pipe, and pre-action configurations, with pre-action systems recommended for sensitive areas such as server rooms and data storage facilities.

Pre Action Fire's expansion into Broomfield follows a series of service area updates across the Front Range over the past year, part of a broader strategy to bring consistent, code-compliant monitoring to fast-growing suburban commercial districts. Property owners can request a system evaluation to determine whether their existing fire alarm equipment meets current monitoring standards, or to schedule installation of a new system ahead of an upcoming inspection cycle.

Business owners and facility managers interested in learning more about [Broomfield fire alarm monitoring](#) coverage and scheduling can reach out through the company's contact channels to arrange a consultation.

About Pre Action Fire, Inc.
