

Phos AI Labs Expands Access to OpenAI's Frontier Models

AI consulting and training practice, part of LOW/CODE Agency's OpenAI Select Partner network, gains earlier access and tools for the mid-market AI systems

MIAMI, FL, UNITED STATES, August 10, 2026 /EINPresswire.com/ -- [Phos AI Labs](#), an [AI consulting and training firm](#) guiding mid-market companies through the shift to AI-native operations, has expanded its access to OpenAI's frontier models through the OpenAI Partner Network.

The access comes through parent firm [LOW/CODE Agency](#)'s recent designation as an OpenAI Select Partner, giving Phos AI Labs earlier access to new models, direct technical support and more tools to deploy for clients already running production AI systems. The expanded access builds on work Phos AI Labs was already doing.

For Human Resources Mexico, a labor law compliance provider, the practice built an AI agent that answers employer questions about Mexican labor law from verified legal sources around the clock, using OpenAI's GPT-4o for reasoning and Text Embedding 3 to search legal documents in real time. The system now handles the majority of the company's client inquiries without human intervention.

That is the kind of production system the expanded access strengthens.

As a practice of LOW/CODE Agency, Phos AI Labs now gets earlier access to OpenAI's newest models and closer technical support, giving mid-market clients the same caliber of AI infrastructure typically reserved for larger enterprises. Phos AI Labs delivers that infrastructure through the three-phase framework it already uses to move companies from AI experimentation to AI-native operations: AI Foundations, Training and AI-Native Operations.

"We want mid-market companies to have the same AI capabilities as the enterprises we compete with for talent," said Jesus Vargas, founder and CEO of LOW/CODE Agency and Phos AI Labs. "This access means the systems we build for clients keep getting stronger without them having to think about which model is behind it."

About Phos AI Labs

Phos AI Labs is an AI consulting and training firm for mid-market companies ready to move to AI-native operations. Founded in 2026 by Jesus Vargas, the firm takes clients through three phases: AI Foundations, Training and AI-Native Operations. Phos AI Labs is a practice of LOW/CODE

Agency.
