

NAVEX Transforms Policy Management with AI-Powered Nira and Integration APIs

LAKE OSWEGO, OR, UNITED STATES, August 11, 2026 /EINPresswire.com/ -- NAVEX, the global leader in integrated risk and compliance management software, today announced [Nira for Policy Guidance](#), the latest AI-powered experience within NAVEX One, delivering Policy Content Integration APIs that securely connect approved policy content across enterprise AI, search and business systems. Built specifically for risk and compliance, these capabilities help employees quickly and confidently find, understand and apply organizational policies, while enabling organizations to reduce compliance workload and improve policy discoverability.

Turning Policies into Trusted, Actionable Guidance

Traditional search and earlier AI assistants often struggle to maintain context, connect guidance across policies or surface the latest approved version of a company policy. This can lead to more follow-up questions, slower decisions and greater reliance on Compliance teams. Nira for Policy Guidance changes that by enabling employees to ask questions in natural language and receive consistent, policy-based guidance drawn from current, approved organizational content.

Nira understands conversational follow-ups, synthesizes information across multiple policies, asks clarifying questions when needed and links every answer directly to its source. With multilingual support and fast, reliable performance across regions, Nira helps employees find answers faster while giving organizations confidence that AI-based policy guidance is transparent, governed and aligned with approved policies.

"The real promise of AI is not answering more questions. It is helping people make better decisions," said Raj Sethuraman, President and Chief Product and Technology Officer at NAVEX. "Nira transforms policies from documents employees search into guidance they can act on. By combining agentic AI with governed policy content, we're helping employees find trusted answers faster while freeing compliance teams to focus on higher-value work."

Connecting Current Policy Content Across the Enterprise

Policy Content Integration APIs provide secure, automated access to approved policy content within NAVEX One Policy & Procedure Management, helping organizations keep enterprise AI, search platforms and connected business systems synchronized with the latest governed information. New capabilities include document change detection, comprehensive policy

metadata and activity data, retrieval of current Word, PDF and PowerPoint source files, and automated synchronization workflows that reduce reliance on manual exports.

Built on NAVEX One's existing authentication, credential management and security framework, the APIs help ensure employees, AI assistants and downstream systems access current policy content while giving IT and engineering teams dedicated documentation to accelerate secure implementation.

Advancing a Governed AI Strategy for Compliance

Nira for Policy Guidance and [Policy Content Integration APIs represent](#) the next step in NAVEX's AI strategy, connecting trusted policy content, intelligent workflows and compliance expertise to help organizations reduce risk, strengthen ethical cultures and make better decisions with confidence.
