

Cordisco & Saile Lands on the 2026 Inc. 5000 and Ranks Among the Top 100 Fastest-Growing Law Firms in America

Eastern Pennsylvania injury law firm recognized for sustained growth rooted in service to clients, staff, and community

BUCKS COUNTY, PA, UNITED STATES, August 11, 2026 /EINPresswire.com/ -- Fast growth isn't something [Michael Saile](#) and [John Cordisco](#) ever chased for its own sake.

“

What we've focused on is doing things well across the whole organization, with good intentions behind every decision we make. ”

Michael L. Saile, Jr.

But this year, it caught up with them anyway.

The firm has been named to the 2026 Inc. 5000, the national list that tracks the fastest-growing private companies in the country, and lands among the top 100 fastest-growing law firms on that list.

The eastern PA-based firm, headquartered in Bucks County, is regionally recognized for its work helping guide personal injury victims through some of the hardest moments of their lives.

Founding Partner Michael Saile put the ranking in perspective.

"Honestly, growth was never the top goal," Saile said. "What we've focused on is doing things well across the whole organization, with good intentions behind every decision we make. That's how we treat our clients when they're going through the worst moment of their lives. That's how we treat our staff, because none of this happens without them. And that's how we show up in our community, because we don't see ourselves as separate from it."

The Inc. 5000 this year recognized companies across industries like AI, healthcare, manufacturing, and professional services that collectively added more than 627,000 jobs to the U.S. economy. For a firm built on relationships rather than volume, being counted among them says less about scale and more about the fact that doing right by people, consistently, tends to build something lasting.

"Every person who calls us is having one of the hardest days of their life and chose us to help them," Saile added. "If we ever get to a point where growth makes us forget that, we've gotten it backwards."
