

Hongle Strengthens Its Position as a Global Leading EVA Foam Tiles Mat Manufacturer

NANNING, GUANGXI, CHINA, August 11, 2026 /EINPresswire.com/ -- Addressing Global Demand for Professional EVA Foam Flooring Solutions

As industries and consumers continue to seek safer, more comfortable, and adaptable flooring solutions, choosing a [Global Leading EVA Foam Tiles Mat Manufacturer](#) with strong production capabilities and customization experience has become increasingly important. EVA foam tiles and interlocking mats have become widely used in homes, schools, fitness centers, playgrounds, commercial spaces, and professional training environments because of their lightweight structure, cushioning properties, easy installation, and versatile applications.

Guangxi Hongle Plastic Products Co., Ltd., operating under the brand name Hongle, has established itself as an experienced manufacturer specializing in EVA foam flooring products. With more than 20 years of experience in EVA foam product development and manufacturing, Hongle focuses on providing reliable flooring solutions for global customers through advanced production capabilities, flexible customization services, and a diverse product portfolio. The company continues to strengthen its role in the international EVA foam mat market by supporting different industries with practical and professionally manufactured products. As demand for customized flooring solutions continues to grow, manufacturers are facing higher expectations regarding product design, material performance, production efficiency, and supply chain stability. Hongle's development reflects the changing needs of the EVA foam industry, where customers increasingly require not only standard products but also OEM and ODM solutions tailored to specific markets.

The Growing Role of EVA Foam Mats in Global Applications

The EVA foam mat industry has developed significantly in recent years as safety, comfort, and functionality have become key considerations in flooring selection. Compared with traditional flooring materials, EVA foam products offer advantages such as shock absorption, moisture resistance, flexibility, and convenient installation. These characteristics make them suitable for various environments where users require protective and comfortable surfaces.

In residential applications, EVA foam mats are commonly used in children's play areas, bedrooms, home gyms, and recreational spaces. Parents and educational institutions often choose foam flooring because it provides a softer surface for children's activities while helping create a safer indoor environment.

In the fitness and sports sector, the expansion of home workouts, professional gyms, yoga studios, and training facilities has created continuous demand for durable exercise flooring. EVA mats help reduce impact during physical activities and provide a more comfortable training experience.

Commercial and educational facilities are also important application areas. Kindergartens, indoor playgrounds, sports clubs, and activity centers often require flooring solutions that combine

easy maintenance with reliable performance. This wide range of applications has encouraged manufacturers to develop more specialized products with different thicknesses, textures, colors, and designs.

Another significant trend in the market is customization. International buyers, retailers, and private brands increasingly look for suppliers capable of producing products according to their

own specifications. This has created opportunities for manufacturers with strong OEM and ODM capabilities.

Hongle's Manufacturing Experience and Production Capabilities

Guangxi Hongle Plastic Products Co., Ltd. has built a comprehensive manufacturing system focused on EVA foam products. Located in Guangxi, China, the company operates a production facility covering approximately 60,000 square meters with a professional workforce of more than 200 employees. This manufacturing foundation allows Hongle to support large-scale production requirements while maintaining consistency in product quality and delivery.

With years of experience in EVA foam processing technology, Hongle has developed expertise in material selection, product design, mold development, production management, and quality control. The company continuously improves its manufacturing processes to meet the requirements of different international markets.

Hongle's production capabilities cover various EVA foam flooring categories, including puzzle mats, exercise mats, play mats, yoga mats, and customized foam flooring products. By combining manufacturing experience with flexible production methods, the company can provide solutions for different customer groups, including distributors, retailers, project suppliers, and private-label brands.

The company also has independent import and export qualifications, enabling it to cooperate directly with international customers and provide professional overseas service support. This global business experience helps Hongle better understand market requirements across different regions.

Comprehensive EVA Foam Mat Product Portfolio

Hongle develops a wide range of EVA foam flooring solutions designed for different environments and usage requirements. Each product category is developed with attention to functionality, user experience, and application needs.

EVA Puzzle Mats for Children and Educational Environments

EVA puzzle mats are one of Hongle's important product categories. Featuring interlocking designs, these mats can be assembled easily without complicated installation processes. Their flexible structure makes them suitable for children's playrooms, nurseries, early education centers, and indoor activity spaces.

For brands and businesses looking to create differentiated products, Hongle provides customized manufacturing services as an experienced [OEM Floor Puzzle Mats Factory](#). Customers can work with the company to develop products with customized colors, patterns, sizes, thicknesses, and packaging options.

The company also supports businesses requiring [OEM Custom EVA Kids Puzzle Play Mats](#), helping customers develop children's flooring products that meet specific market preferences and branding requirements. Through customized production, Hongle helps partners create products suitable for different regional markets and consumer groups.

Fitness Flooring Solutions for Professional and Home Training

The global growth of fitness activities has increased demand for reliable exercise flooring solutions. Whether used in gyms, home workout areas, martial arts studios, or sports training facilities, EVA fitness mats provide cushioning support and help improve training environments.

As a professional China Fitness Floor Mat supplier, Hongle develops fitness flooring products designed for practical use. These mats can be customized according to different requirements, including thickness, surface texture, dimensions, and design specifications.

Fitness flooring needs to balance durability, comfort, and ease of maintenance. Hongle focuses on developing products that can meet these functional expectations while providing flexible options for different application scenarios.

Decorative and Functional Interlocking Foam Flooring

Modern customers increasingly expect flooring products to combine performance with visual appeal. In addition to traditional foam mat designs, Hongle develops products with different surface finishes and patterns to meet changing market preferences.

Its professional high-density EVA wood-grain interlocking foam mats represent the development trend toward multifunctional flooring solutions. These products combine the practical benefits of EVA foam with a wood-inspired appearance, making them suitable for spaces where users want both comfort and decorative value.

Such flooring solutions can be applied in residential interiors, recreational areas, commercial environments, and other spaces requiring easy installation and flexible replacement.

OEM and ODM Services Supporting Global Business Partners

Customization has become an important factor in the EVA foam flooring industry. Different markets may require specific product designs, packaging styles, colors, or functional features. Hongle provides OEM and ODM services to help customers transform product concepts into manufactured solutions.

The company supports customization throughout different stages, including product design, material selection, production development, and packaging preparation. This service approach allows international customers to develop unique product lines while benefiting from Hongle's manufacturing experience.

For distributors and brand owners, working with an experienced manufacturer can improve supply chain efficiency and provide greater flexibility in product development. Hongle's OEM capabilities allow it to serve various business models, from bulk purchasing to customized private-label projects.

Quality Management and International Market Development

Maintaining stable product quality is essential in the global EVA foam mat industry. Hongle focuses on improving production management systems and quality control procedures throughout the manufacturing process.

The company's experience in international markets has also helped it understand different customer expectations regarding product specifications, packaging standards, and delivery requirements. Hongle has participated in international exhibitions, allowing it to communicate with global buyers and understand market developments.

Through continuous improvement in production technology and customer service capabilities, Hongle continues to develop products that meet the changing requirements of the global foam flooring market.

Moving Forward with Professional EVA Foam Flooring Solutions

The future development of the EVA foam mat industry will continue to be influenced by trends

such as increased safety awareness, expanding fitness participation, customized product demand, and the growth of indoor recreational spaces. Manufacturers with strong production experience and flexible customization capabilities will remain important partners for global businesses.

With extensive EVA foam manufacturing experience, a broad product range, and professional OEM/ODM capabilities, Hongle continues to strengthen its position as a reliable EVA foam tiles mat manufacturer serving international markets.
