

Aiarty Video Enhancer Powers Final-Stage 4K Upscaling for AI-Generated Videos

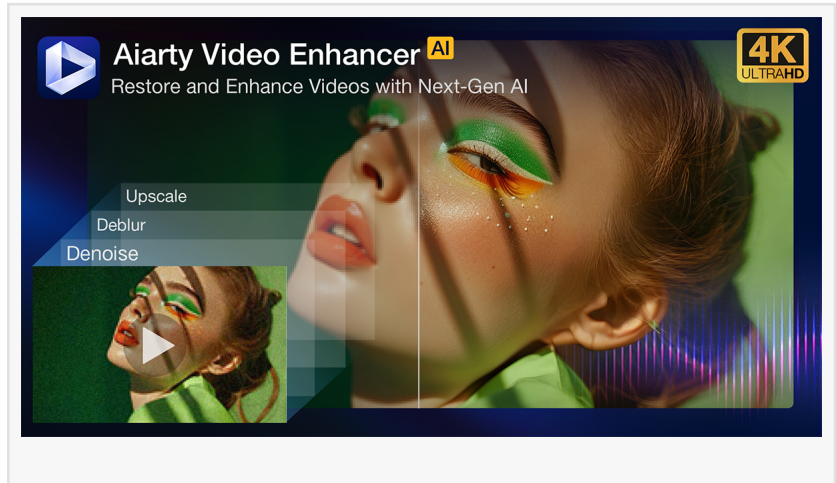

Aiarty Video Enhancer helps creators upscale AIGC footage to 4K and enhance visual quality for modern workflows.

CHENGDU, CHINA, August 13, 2026

/EINPresswire.com/ -- [Aiarty Video](#)

[Enhancer](#) provides a local post-production solution that helps creators upscale AI-generated videos to HD and 4K resolutions, enhance visual details, reduce artifacts while preserving the original creative style. Integrated into

existing AI video production workflows, Aiarty allows creators to refine final output without relying solely on high-resolution generation that burns through cloud credits.

As generative AI video tools grow more sophisticated, creators face a persistent operational bottleneck: the increasing computational cost and token consumption required to natively render long, high-resolution sequences in the cloud. Consequently, a growing industry shift favors generating videos at lower resolutions and subsequently utilizing specialized [local video upscalers](#) to prepare content for HD and 4K delivery.

"The modern AI video workflow doesn't end at generation; the final enhancement stage plays an important role in preparing content for professional delivery," said Jack Han, CEO at Aiarty. "By incorporating local upscaling and refinement into the production process, creators bypass heavy cloud token fees and gain greater control over resolution, motion interpolation, and artifact cleanup for 4K results."

How Aiarty Video Enhancer Supports AIGC Workflows

Aiarty Video Enhancer is designed to bridge the gap between AI-generated footage and high-resolution video output. Instead of simply increasing video resolution, the software analyzes frames and applies AI-based enhancement techniques to improve overall visual quality. Key capabilities include:

Upacale AIGC Videos to 4K with Visual Consistency

Crafting a compelling AIGC video requires careful prompt design, model selection, and creative direction to establish a unique visual style.

Aiarty Video Enhancer [upscales AI-generated videos](#) to HD and 4K resolutions by rendering crisper, finer details without over-processing or altering the native aesthetic. It preserves the creator's original artistic intent, ensuring that the unique mood crafted during generation remains authentic and undistorted.

Artifact Reduction and Quality Refinement for AIGC Videos

AI-generated videos can sometimes contain visual imperfections from the generation process, such as visual noise, compression artifacts, and softness in fine details. Aiarty Video Enhancer provides AI-based restoration and enhancement tools that refine these visual challenges during post-production. It helps reduce artifacts, improve detail clarity, enhance facial and texture quality, and maintain greater consistency across frames, providing creators with cleaner, more refined footage for upscaling, editing, and final delivery.

AI Frame Interpolation for Smoother Motion

Choppy frame rates and jerky movements are a common challenge in AI-generated video content. Aiarty Video Enhancer includes AI frame interpolation capabilities that analyze existing frames and generate additional frames to create smoother transitions. This improves motion fluidity and provides more consistent playback for video content intended for online publishing, presentations, or creative projects.

Local AI Video Enhancement and Batch Processing

Operating locally on users' hardware, Aiarty Video Enhancer enables creators to refine AI-generated footage without relying on additional cloud-based processing for upscaling and enhancement. This helps control production costs while offering greater flexibility over video enhancement workflows. Additionally, the software supports batch processing, enabling users to efficiently upscale multiple video clips simultaneously.

Supporting Flexible Video Creation Workflows

Designed as a versatile standalone solution, Aiarty Video Enhancer integrates seamlessly into modern post-production pipelines. Creators can process AI-generated footage from any text-to-video platform and upscale content to HD or 4K resolutions. From independent artists experimenting with generative tools to production teams managing professional pipelines, the software provides a reliable final-stage enhancement step that adapts to any creative workflow.

Pricing and Availability

Aiarty Video Enhancer is fully compatible with both Windows and macOS, offering immediate availability for creators looking to upgrade their production pipelines. Users can thoroughly evaluate the software through an official free trial.

To accommodate diverse user needs ranging from solo hobbyists to professional production studios, a time-limited 36% off promotional discount is currently accessible

- Year License: Currently marked down to \$69 (originally \$99, saving \$30), covering 1 device (Windows PC or Mac).
- Lifetime License: Available for a one-time payment of \$149 (originally \$235, saving \$86), supporting up to 3 PCs or Macs with lifetime updates.

About Aiarty

Aiarty is the AI-focused innovation brand from Digiarty Software, dedicated to developing cutting-edge multimedia solutions. With a talented team of passionate engineers dedicated to pushing boundaries, Aiarty develops cutting-edge AI tools meticulously crafted to elevate digital experiences worldwide.

About Digiarty Software

Digiarty Software, the developer of Aiarty, WinX DVD, and VideoProc, is a leading provider of multimedia software solutions for over 20 years. Renowned for their unwavering commitment to quality, performance, and customer satisfaction, Digiarty boasts a diverse software suite encompassing DVD backup, iPhone management, video transcoding, editing, and more. The comprehensive offering has garnered over 256 million software installations across 180 countries. To get more info about the company, please visit its official web page:
