

CompareMedsRx Expands Health Services By Bringing Users Access to the Galleri® Multi-Cancer Early Detection Test

Platform continues its mission to make healthcare accessible and transparent for all

SCHAUMBURG, IL, UNITED STATES, September 2, 2026 /EINPresswire.com/ -- [CompareMedsRx](#), the free prescription price comparison platform on a mission to make healthcare accessible and transparent for everyone, recently announced it will offer direct access to GRAIL's Galleri® multi-cancer early detection test. The offering marks a significant expansion of the CompareMedsRx platform beyond prescription savings, giving users access to one of the most advanced cancer screening tools available today.

Since launching in 2024, CompareMedsRx has grown rapidly to serve more than 250,000 users across 42 active partner organizations, aggregating prices from 24 discount programs across 70,000+ pharmacies nationwide to help individuals save up to 85% on prescription medications. Offering the Galleri test reflects the platform's continued growth and its commitment to expanding the suite of health services available to users, going beyond prescription savings to deliver tools that support whole health outcomes.

The Galleri multi-cancer early detection test is a first of its kind test that screens for a cancer signal in the blood for more than 50 types of cancer before symptoms appear. By integrating access to the Galleri test through the CompareMedsRx platform, users can now take a more proactive and comprehensive approach to managing their health.

"At CompareMedsRx, our mission has always been to make healthcare more accessible and transparent for everyone, because people deserve to know their options and make informed decisions about their health," said Hiten Gardi, Founder and CEO of CompareMedsRx.

"Partnering with GRAIL is a natural extension of that mission. Early detection saves lives, and we are proud to put that capability directly in the hands of the people we serve."

Users can learn more and access the Galleri multi-cancer early detection test through CompareMedsRx at comparemedsrx.com/grail-multi-cancer-test.

Important Safety Information: The Galleri test should be used in addition to healthcare provider recommended screening tests. The Galleri test does not detect a signal for all cancers and not all cancers can be detected in the blood. False positive and negative results do occur. Rx only. For
